Armistice Night At Cereal Nov. 11

Preparations for a big night at Cereal on the night of November 11, (next Monday) are reported to be complete, and all that is now required to make the celebration a complete success is a satisfactory attendance.

The committee in charge ask every returned man in the district to make a real effort to attend. The banquet will commence sharp at 7.30 p.m., and will be followed by toasts, responses and a short program after which the hall will be cleared for a grand dance.

Each returned man attending is permitted and asked to bring a lady.

Be in Cereal on Monday evening and enjoy the hospitality of our neighbor town.

The Local Option Vote at Sibbald

A doubt was left in the minds of some of our readers as to the result of the vote taken at Sibbald last Tuesday. The vote was taken to decide whether Sibbald should obtain a licence to operate a beer parlor, and those in favor of having a beer parlor polled the majority vote.

The result of the four polls given in our last issue is repeated. Those in favor of the beer parlor are recorded under "For" Those not in favor are recorded under the heading "Against".

Oyen Agricultural Society Annual General Meeting Saturday, November 16

The annual general meeting of Oyen Agricultural Society will be held in the Masonic Hall Oyen, on Saturday afternoon, November 16, commencing at 2 o'clock.

It is hoped that there will be a large attendance and that those members who have constructive suggestions to make will present them at the meeting. The matter of a new grand stand will be discussed.

Halloween Dance

The halloween dance given in Oyen Theatre last Thursday night was well attended and proved a very enjoyable function. Excellent prizes were given by the management for costumes as follows:

Best dressed lady, Miss Margaret McKelvie as a bride won a china tea set.

Best dressed man, Mr. Elmer Clough as a chinaman won a smokers set.

Best comic, lady, Miss Vera Kornichenko as a rooster, won a manicure set.

Best comic, gent, Mr. Arthur Johnson as a "forty-niner", won a clock set.

A special prize was given by Mr. I. F. Shaker, to T.K.O. Lodge, who was dressed as a jockey, ten free admissions to the theatre.

The judging was done by Mr. I. F. Shacker, Chas. P. Snyder and Mr. E. D. Thygesen.

Red Cross Seals

This month there has come into the Head Office of the Red Cross Society in Edmonton the annual shipment of Xmas Seals to be sold for the benefit of the 1926 crippled children in hospital under the Junior Red Cross in Calgary and Edmonton.

It is a stupendous task getting rid of such a large quantity and would be well nigh impossible were it not for the spendid band of eager young salesmen and saleslades who make it their especial pride and privilege to merchandise these attractive stamps.

When every Red Cross Junior member begins business as a seller of seals he puts himself in touch with a great united effort that extends from coast to coast in every province of Canada where there are Juniors working to keep their pledge of service to the sick.

Alberta Juniors have long been famous for their remarkable efforts at Christmas time, or rather earlier than that, for it is necessary that seals be sold for parcels and letters that are going on their errands of goodwill across the seas to the Motherland or to other parts of the world. It is an easy matter for reader to decide that in so far as he is able, (and surely all can do this small courtesy) he will patronize the little merchants who are earnestly trying to dispose of packages of seals.

A little imagination helps the purchaser in the pleasant thought that his seal money, though small in itself, is part of a great and worthy effort made by the children of the province to assist those who are so unfortunate as to be patients in hospital, and who, thanks to Junior Red Cross, are getting the chance they need to be made well and whole.

Cable advices from London state that Captain Ronald Stuart V.C. D.S.O., R.N.C., R.N.R., commander of the Canadian Pacific liner "Duchess of York," has been officially selected to attend the Armistice Day ceremonies at the Cenotaph in London. Captain Stuart is one of the youngest liner captains on the North Atlantic and the only passenger ship captain to wear the Victoria Cross. It is expected that he will also be present at the Prince of Wales' dinner to V.Cs.

Canada Among the Nations

Canadians of all classes can hardly fail to feel a thrilling pride in the rapid strides forward made by their Dominion in the realm of international affairs. Since that fateful day in 1914, when the world was plunged into war, and Canada at once, and without the slightest hesitation, took its place in the front rank of the Allied hosts, the growth of this country in world estimation and influence, has been one of the remarkable features of the international situation.

Hardly a year has passed without witnessing some new advance step taken, or some noteworthy achievement added to the record, revealing Canada's new and higher status in the councils of the nations.

Concisely, but eloquently, Sir Robert Borden outlined the Dominion's growth in international stature within the short space of the last two years in a memorandum prepared and submitted by him to the Institute of Pacific Relations now in session at Kyoto, Japan. Since 1927, when the Institute last assembled, Canada had adhered to the multilateral pact for the renunciation of war, has given adherence to the optional clause in the statutes of the Permanent Court of International Justice, has exchanged ministers with France and Japan.

Canada, too, has aligned itself whole-heartedly with Premier Ramsay MacDonald and President Hoover in their fine effort to promote mutual understanding and goodwill between all sections of the English-speaking world, thus paving the way for a larger measure of world disarmament, and making an immensely important advance toward the goal of permanent world peace.

Nor has Canada confined its efforts to the signing of treaties and the making of gestures. When the unfortunate incident of the 'I'm Alone' arose,—a happening which in days gone by might have precipitated almost immediate war, and certainly a feeling of hostility containing the seeds of future trouble, Canada kept cool, and through the medium of diplomatic correspondence between Ottawa and Washington, a basis of arbitration was quickly and mutually arranged to the satisfaction of both nations. Speaking of this correspondence, Sir Robert says:

"The diplomatic correspondence on the subject between Canada and the United States is admirable in tone, and the questions of fact and law presented are set out lucidly and temperately on each side."

In the Assembly and Council of the League of Nations, Canada's voice is always heard in support of all measures calculated to make for peace. This Dominion is a real leader at Geneva in all efforts to promote international understanding and goodwill, and in the devising of ways and means to remove causes of suspicion and irritation.

Co-incident with the rise of Canada as a factor in international affairs, the foreign trade of the Dominion has increased by leaps and bounds until now this country can boast of the second largest world trade per head of population. Canada's ministers at Washington, Paris and Tokio, are reinforced in th's work of creating international goodwill and prestige for Canada by a large and steadily increasing number of trade commissioners in all parts of the globe.

Canada's strong position can be made stronger through the united sympathy and effort of the Canadian people. Sir Robert Borden, while voicing unqualified praise of the anti-war pact, declared that the peace of the world cannot be secured by treaties alone, nor can it be maintained by force. The same foundation which assures ordered liberty and justice in a modern civilized state must be created on an international scale if peace is to endure.

The education and idealism of the people, their inherited respect for law, and their determination to maintain order and justice against crime and lawlessness," Sir Robert said, "are the real foundations upon which stable government rests. In the world there must be an informed public opinion upon which will be established between the nations the enthronement of public right and justice."

Canada, no less than other countries, has everything to gain through the development of such an international public opinion. Only by the maintenance of peace can Canada's great foreign trade continue to prosper and grow. The development of an international public opinion must begin within each national unit and spread through the whole body of humanity.

Canada has that international viewpoint. It is growing stronger, and every true Canadian will exert himself or herself to foster it. It is one of the greatest things in the nation and in the world today.

Commands Atlantic Liner

Ronald Stuart Was First Canadian To Win the Victoria Cross In British Navy

At least one Canadian holder of the coveted Victoria Cross "worked his way" to England for the Prince of Wales' dinner on Nov. 9, and none can deny that he earned his passage. This is Commander Ronald Stuart, V.C., captain of the Canadian Pacific liner, "Duchess of York," the first Canadian to win the Victoria Cross in the British Navy.

Commander Stuart brought the C.P.R. steamer "Princess Elaine" to the Pacific coast on her maiden voyage last year and was later elevated to command of the crack Atlantic liner which he now sails.

Mother—"Shall we invite the boy next door to your birthday party?"

Little Lottie—"I don't think so — he's so good nobody likes him."

WHAT WILL IT DO?

Women are saying: "Pinkham's Compound keeps me fit to do my work." "I was nervous and all run down. Now I eat better and sleep better—". "It helped my thirteen year old daughter." "I took it before and after my baby was born." —"I am gaining every day."

Lydia E. Pinkham's Vegetable Compound

W. N. U. 1810

England Not So Slow

When Necessary Can Show Other Countries What Speed Is

The distance between Paddington and Swindon, in England, is seventy-six and one quarter miles. The Great Western Railway of that country has announced that it has cut the time of one of its passenger trains between these stations to seventy minutes. That looks as if these English trains are operating at about sixty-six miles an hour.

Sometimes we think that we are masters of all the speed on this side of the water. When our trains average fifty miles an hour we consider that we are not letting any grass grow under our feet.

Not long ago a British aviator went out and flew a seaplane at a speed of 368 miles an hour. That was the fastest time ever made by any kind of vehicle capable of carrying a human being.

It must be admitted that when the Old Country people set out to make fast time they are in a hurry. It is quite erroneous to harbor the opinion that they are slow. They have a leisurely way in certain affairs, but in others they are speedy.

Another Titled Farmer

Sir Sandeman Allen, British Member of Parliament, has bought a farm in the Prince Albert district, to which he returned following his trip to the Pacific coast with Lady Allen and their son.

There are about a million square miles of islands in the sea.

Safer To Stand Up

Mussolini Had Amusing Experience At Theatre In Italy

You don't have to believe this, but a gentleman returned from abroad says that an American girl studying Italy went into a moving-picture theatre and suddenly realized that she was sitting just behind none other than Il Duce Mussolini himself. His visit was incognito, and successfully so, for no one recognized him in the half light of the cinema. He was enjoying everything hugely until, in the midst of a newsreel, a portrait of himself in heroic pose was thrown on the screen. The spectators of course, all arose, cheering wildly, all save Mussolini himself, who sat through the demonstration, fidgeting. His had been, obviously, a rather nice point—whether to stand up and risk being recognized honoring himself, or to remain modestly seated. After the excitement was over an old Italian lady who had the seat next him leaned over and said: "Signor, that's how we all feel, but it's safer to stand up."

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin; the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says:—"I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Demonstrates New Serum

Young Military Doctor Discovers Substitute For Blood Transfusion

The efficacy of a new serum, which is said to take the place of a blood transfusion, was demonstrated at the Pean Hospital, Paris, where the life of a motor-cyclist was saved after he had been badly hurt in an accident. The serum is the discovery of a young military doctor attached to the branch of the Pasteur Institute, in Hanoi, Indo-China.

Before the serum was tried on human beings, experiments were conducted in Paris at the Pasteur Institute. The serum was injected into a dog from which most of the blood had been drained, and the animal immediately revived and took food. The motorcyclist was successfully treated when he had already lost two quarts of blood.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Clears away all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

The Union of South Africa, in 1921, had a white population of 1,500,000 against 5,000,000 blacks.

American Tribute To Ramsay MacDonald

New York Paper Makes Kindly Reference To His Sincerity Of Purpose

Though he modestly puts away the personal aspect of it, it has been a distinct triumph for Ramsay MacDonald, the man. His bearing has been perfect. Not one slip in act or speech did he make while he was here. Deeply impressive has been his abiding sense of the high mission on which he came, and which he hopes will lead to all-embracing benefits throughout the entire world. His eloquence has been that of elevation of mind and nobility of purpose. On divers strings he has sounded the one clear note of a passion to secure established peace on earth through every reasonable and honorable means. Such speaking as his, coming to a climax as it did in his magnificent address on Friday night, has seldom been heard in any country from the lips of a citizen of another.—New York Times.

New Grain Loading System

New and Improved System To Be Put In Operation At Montreal

A new and improved system of grain loading will shortly be in operation in the Port of Montreal. The first of two mechanical grain loaders is being erected on shed 9, one of the berths allotted to the Canadian Pacific Steamships, and the second will be set up shortly afterwards. It is expected that further improvements along this line will be part of the fall building programme.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victim awake the whole night long. Morning finds him wholly unfitted for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

Recipes For This Week

(By Betty Barclay)

VEGETABLE SOUFFLE

1 cup left-over vegetables.
1 tablespoon flour.
1 tablespoon butter.
1 teaspoon sugar.
½ cup milk.
2 eggs.
Salt.
Pepper.

Add the flour to the butter which has been melted in a saucepan, and blend until smooth. Add the water slowly, while stirring to keep smooth. Cook one minute, stirring constantly. Then add the milk. Pour the mixture over the eggs which have been beaten until light, and to which have been added sugar, salt and pepper. Add mixture to the vegetables which have been placed in buttered baking dish. Bake in slow oven until souffle is set —about 40 minutes.

LEMON CATSUP

Grated rind of 4 lemons.
Juice of 4 lemons.
1 tablespoon grated horseradish.
1 teaspoon salt.
2 teaspoons white mustard seed.
2 teaspoons celery seed.
4 cloves.
Few blades mace.
Few grains red pepper.

Mix ingredients; boil thirty-five minutes, and bottle while hot. Let stand five or six weeks to ripen. Serve with fish.

Another thing that the world needs is an alarm clock which will come right back and ring again after you shut it off in the morning.

Feel Sore? Use Minard's Liniment.

Cost Of Keeping Clean

Ten Cents Of Every Dollar Goes Toward Banishing Dirt Says Statistician

Ten cents of every dollar spent by the average American family is for the purpose of keeping clean, a survey of this little discussed phase of daily life by Ronald Millar, New York statistician, shows.

Basing his calculations upon a family of four, Millar, in The American Magazine, estimates that $1,000 a year is the least price of cleanliness that can be quoted. Of this amount $469.35 is the minimum yearly total for personal and household cleanliness; $485 for the services of cleaners whether employed directly or indirectly, and $72.80 for civic cleanliness.

In personal household cleanliness the statistician includes soap, polishes, shaving equipment and materials, hot water for washing or bathing, haircuts for husband only, toothbrushes and dentifrices, handkerchiefs, towels, linen and power or upkeep for whatever cleaning devices that may be used. The housewife is granted, under the second group, 35 cents an hour at the rate of two hours a day for 300 days in the year. Whether or not she receives any actual pay, the work is still chargeable since it is time which any woman might employ for cash profit. Likewise, says Millar, the cleaning of railway cars, automobiles and even the grooming of 19,000,000 horses that still exist in the country, ultimately becomes a charge upon the individual.

"Food and shelter lead in the cost of living," says Millar, "but the cost of cleanliness is higher than that of clothes, education amusements, owning an automobile and many other things that figure more prominently in the household budget."

An Oil For All Men. — The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

The City Of Parks

The Moose Jaw Optimeter—organ of the young men's section of the Board of Trade—has awarded to the thriving town in question the title of "The City Of Parks," and mentions, incidentally, that there were 40,000 visitors to the Moose Jaw Animal Park since May, not including the 5,000 present at the Indian Pageant.

Minard's Liniment relieves stiffness.

Watch the Lanterns

The Farmer's Advocate says: As the days shorten the lantern comes into use in choring, night and morning. Plenty of hooks should be provided, and wires as well, along which the lantern may slide. Carelessness with the lantern has resulted in many disastrous fires."

Noted Western Writer Passes

Mrs. Charlotte Gordon, Of Calgary, Was Distinguished Author

Mrs. Charlotte Isabel Gordon, known throughout Canada by her pen-name, Charlotte Gordon, died recently at her home in Calgary, following an illness of one month.

Mrs. Gordon, who was the wife of A. J. Gordon, was one of Calgary's best known woman writers, for besides the fame which came from the publication of her novel, "Red Gold," she was equally noted for her many magazine and newspaper feature articles. Last July she had the distinction of representing the Alberta branches of the Canadian Authors' Association at the annual convention of that organization in Fredericton, N.B., and the choice was a popular one, as in both the C.A.A. and the Women's Press Club, of which she was also a member, she was known as an ardent worker.

Deceased was the only daughter of Mr. and Mrs. James Melvin Toombs, who now resides at Vancouver, and went to school at Stonewall, Man., where her father was the editor of a newspaper. She married Mr. Gordon when he was living at Carman, Manitoba, and soon afterwards they moved to Vancouver, later coming to Calgary to reside in 1917.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

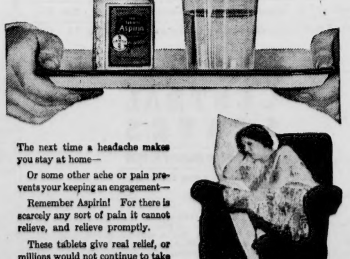

"Made In Turkey" Week

Owing to the success of the first exhibition in Constantinople of Turkish national products, it has been decided to fix a week in August every year and to exhibit and sell only articles produced in Turkey.

Poultry Pool Grows

Membership in the Manitoba Cooperative Poultry Marketing Association Ltd., Hartney, Man., has increased during its seven years of life from 1,000 to 11,000.

Needless Suffering

The next time a headache makes you stay at home—

Or some other ache or pain prevents your keeping an engagement—

Remember Aspirin! For there is scarcely any sort of pain it cannot relieve, and relieve promptly.

These tablets give real relief, or millions would not continue to take them. They are quite harmless, or the medical profession would not constantly prescribe them.

Don't be a martyr to unnecessary pain. To colds that might so easily be checked; neuritis, neuralgia; to those pains peculiar to women; or any suffering for which Aspirin is such an effective antidote.

You need not hesitate to take Aspirin. It is safe. It is always the same. It never depresses the heart, so use it as often as needed; but the cause of any pain can be treated only by a doctor.

BAYER ASPIRIN
TRADE MARK REG.

LIQUOR CONTROL FAVORED BY VOTE IN NOVA SCOTIA

Halifax.—In a plebiscite on the liquor question the number of Nova Scotia voters who expressed a preference for government control and sale exceeded by more than 28,000 the number of those who indicated their desire that the present prohibition law be kept.

Both Dr. H. R. Grant, leader of the prohibition forces, and J. H. Winfield, heading the government control campaign, interpreted the figures as indicative of the defeat of the prohibition law.

Two questions were before the voters but thousands voted on only one. The questions were whether the prohibition law, known as the Nova Scotia temperance act, should be continued or whether a system of government sale should be set up.

With only 45 small polls unheard from out of a total of 1,137, the figures were:

For the temperance act, 61,672.
Against, 56,024.
For government control, 89,757.
Against, 41,180.

The vote will be interpreted officially by the government.

Premier E. N. Rhodes said he would wait for more complete information before making a statement.

Only Nova Scotia and Prince Edward Island of the provinces of Canada now have prohibition laws.

Upholds Alberta Court Ruling

Privy Council Says Certain Victory Bonds Liable To Death Duties

London, Eng.—The judicial committee of the privy council dismissed with costs the appeal of the Royal Trust Company against the government of the province of Alberta.

The decision upholds an Alberta court ruling that succession duty is payable on certain Victory Bonds, portion of the estate of the late Wm. Hull, such bonds being "legally situate" within the province of Alberta.

The ruling is important as establishing liability of Dominion government bonds to succession duties taxation and it is understood the province of Alberta is a large financial gainer by the ruling.

H. P. McMillan, K.C., of London, and Attorney-General Hon. J. F. Lymburn of Alberta, represented the province and Geoffrey Lawrence, K.C., London, and H. G. Noal, of Calgary acted for the trust company.

Lipton Building New Yacht

Shamrock V. Being Constructed Under New York Club Rules

London, Eng.—The keel of Sir Thomas Lipton's new challenger for the American Yacht Cup, Shamrock V. was laid at the Camper and Nicholson's yard at Gosport without ceremony.

Sir Thomas was not present. The yacht will be built to a 76-foot rating under the New York Club rules and will be fitted with a motor. The rig will be the same as that of the defender of the cup, thus promising a stirring contest for supremacy.

Fort William's Founder Dead

William P. McKellar Came To Lake Head In 1883

Fort William, Ont.—Founder of the city of Fort William, Peter McKellar, is dead, at the age of 91 years. He was the last of the McKellar brothers who came to the lake head 66 years ago and formed the nucleus of the first settlement. McKellar was the first to discover gold, silver, copper, iron and lead in the Fort William area. He was a member of London and American Geological Societies.

New Liner Near Completion

London, Eng.—It is announced that the "Empress of Japan," the new 25,000 ton oil burner liner now building by the Fairchild Shipbuilding Company, Ltd., Scotland, will be launched on December 17 by Mrs. E. R. Peacock, wife of E. R. Peacock, director of the Canadian Pacific Railway. The "Empress of Japan" is to be placed on the Pacific service of the Canadian Pacific between Vancouver, Japan and China.

Fire Causes Serious Loss

Winnipeg. — Fire destroyed the large cattle barn at the Manitoba Agricultural College and tons of hay stored in the loft of the building. The loss is estimated at $35,000.

Writ Has Been Issued

General Higgins Asks Transfer Of Salvation Army Property

London, Eng.—A writ on behalf of General Higgins, the new commander-in-chief of the Salvation Army, asking for transfer to himself of army property now held in the names of the executors of the late General Bramwell Booth has been issued.

The writ was served immediately on General Booth's executors, Mrs. Booth, Commissioner Catherine Booth, his daughter and a solicitor, Sneath. The situation at present is that while all property of the army in Great Britain is controlled by General Higgins, its ownership remains in the hands of General Both's executors.

An All-Canadian Menu

Food From Every Province Will Be Feature At Winter Fair

Ottawa.—A menu featuring foods gathered from coast to coast will be a feature, arranged by the ariculture department for the opening of the National Winter Fair at Toronto, on November 20.

There will be oysters from Prince Edward Island, fish from Nova Scotia, maple syrup from Quebec, beef from the west, fruit from Ontario and British Columbia — a little something from each and every province to suit the epicurean tastes of the cattlemen.

Will Erect Modern Elevators For Crop

France To Have Up-To-Date Facilities For Handling Wheat

Coulommiers, France.—France is to have a modern system of grain elevators. Strange as it may seem, there are but few elevators in France, and most of those that are modern are at the ports.

France's wheat crop is stored rather haphazardly. Jean Hennessy, Minister of Agriculture, told a congress of farmers here that the government would help to build enough up-to-date elevators to handle 30,000 bushels, a tenth of this year's harvest.

Plan Pacific Air Liners

Monster Dirigibles To Operate Between California and the Philippines

Akron, Ohio.—Two monster dirigibles, the largest in the world, are to be constructed and placed in regular operation between Southern California and the Philippines, in 1933, by the Pacific Zeppelin Transport Co., according to Paul W. Litchfield, chairman of the board. The Pacific Liners will carry 80 passengers and ten tons of mail, express and freight. They will cut in half the crossing time now made by the fastest boats.

Canadians Are Defined

Dominion Statistician Settles Controversy Of Long Standing

Ottawa, Ont.—Every one of Canadian nationality is a Canadian; every one born in the Dominion is of Canadian birth; and every one whose family has been of three generations' residence or more in Canada is a Canadian "in a special sense," according to a report issued by R. H. Coates, Dominion statistician.

The report would seem to settle a controversy of long duration as to just what constitutes "a Canadian."

New Position For Dr. Gunn

Victoria.—Dr. W. R. Gunn, at present identified with the health of animal section of the Federal Department of Agriculture with headquarters in Toronto, has been appointed livestock commissioner for British Columbia, according to announcement of the provincial minister of agriculture, Hon. W. Atkinson. Dr. Gunn will assume his new duties on December 1.

Leaves Wheat Pool

Winnipeg.—E. B. Ramsay officially leaves the post of general manager of the Canadian Co-operative Wheat Producers and takes over the chairmanship of the Board of Railway Commissioners. No successor to Mr. Ramsay has been appointed. He will continue to act in an advisory capacity on any matters which have come up during his tenure of office.

Dunning Will Come West

Ottawa, Ont.. Hon. Charles Dunning, Minister of Railways, will join Premier Mackenzie King on the latter part of his western tour and return with him to Ottawa. Mr. Dunning will meet Mr. King at Regina, when the prime minister is returning, and will be present at the various meetings held on the eastward journey.

VICTORY FOR FERGUSON FORCES IN ONTARIO

Toronto.—Premier G. Howard Ferguson, with his Conservative government intact and a greatly increased army of supporters, is now more solidly entrenched as the dominant political force in the province of Ontario.

The ranks shattered by the defeats inflicted by the Conservatives in rural strongholds they regarded as invulnerable, only a corporal's guard of opposition strength will face the government when the legislative assembly, the 18th in the history of the province, convenes to enact the legislation for a greater Ontario, on which Premier Ferguson based his appeal to the people.

In giving the Ferguson government a mandate to administer the affairs for a third successive term, the people of Ontario gave the administration the strongest legislative representation ever accorded a government in the province.

The sweeping victory which exceeded the hopes of the most optimistic government supporters was a ringing answer to the prime minister's declaration that he was willing to stake his political life on the government's policy of control and sale of liquor by the government—the issue on which he was returned to power in the 1926 general election.

The standing as compared with the 1926 election follows:

Party	1929	1926
Conservatives	93	77
Liberals	9	21
Progressives	3	11
U. F. O.	1	13
Ind.Conservatives	1	0
Liberal-Progressives	1	0
Deferred	1	0
Doubtful	3	0
Total	112	112

The landslide that swept the Ferguson government into power with at least 93 supporters in a house of 112 members carried down to defeat with it J. G. Lethbridge, the 74-year-old Progressive party leader who waged a hard fight in West Middlesex, which he had represented since 1919. He lost the seat in a three-cornered contest to Dr. L. W. Freele, the Conservative candidate by the slim minority of 39 votes.

W. E. N. Sinclair, K.C., the Liberal leader, saw his forces, which numbered 21 in the last house, dwindle to nine. He was re-elected in Ontario South, but his majority of more than 2,000 in the 1926 election was cut down to a bare 1,000.

Submarine Sets Depth Mark

Spezia, Italy.—The Italian submarine "Tito Speri," 830 tons, submerged to the extraordinary depth of 343 feet in tests and remained there 20 minutes. Experimental hydro-phonic communication was carried on from the depth with the submarine "Selesa" on the surface.

FAMOUS WOMAN EXPLORER

Lady Richmond Brown, distinguished woman explorer, who has arrived in New York from England. In January she leaves for the wilds again, at the head of an American-Indian expedition, with which Mr. M. Mitchell Hedges, famous explorer, will be connected. She was with Mr. Hedges when his party discovered the Chuncanaque Indians in a hitherto totally unknown part of Panama.

Edmonton Students Hear Unusual Lecture

Former German Officer Gives Address At Edmonton Military Academy

Edmonton, Alta.—With a former commander in the Imperial German navy relating his own experiences in the battle of Jutland, famous naval encounter of the world war, the Edmonton military academy heard an unusual lecture here.

Erich Alleweldt, who fought as a German officer in all the major naval engagements of the war, and to whose address the academy listened, came to Alberta two years ago, and is now a progressive farmer in the Brightbank district.

Albertan Wins Huge Sum

Quebec. — George Kowalchuk, of Hackett, Alberta, and James Westcott, of Springvale, Mass., won the first two prizes each amounting to $79,399.50 in the Army and Navy Veterans' sweepstake on the Cambridgeshire race at Newmarket, England. The sweep was arranged so that each horse was drawn by two ticket holders. Both of these men drew Double Life.

Arab Boycott In Jerusalem

Jerusalem.—Two hundred Jewish shopkeepers of the old city submitted a memorandum to the high commissioner, Sir John Chancellor, declaring that an organized Arab boycott of Jews was still going on. Arab pickets were said to be watching the entrance of Jewish shops destroying all goods purchased there by Arabs.

Favorite Star Goes C.P.R.

Travelling from Winnipeg to Montreal by Imperial Limited, crack Canadian Pacific Flyer, Colleen Moore, smiling Irish actress, opened her eyes to more than average wideness as she got her first glimpse of the prairies and the East from the luxurious compartment of a Canadian Pacific train de luxe. She told interviewers that she had been in a condition of amazement all through her trip and the word "wonderful" was continually on her lips. She is shown here stepping from the train at the Windsor Street station, Montreal, just before receiving an ovation from her countless admirers who gathered at the depot and later at the theatre where she appeared in person.

May Abolish Capital Punishment

Question Is Now An Issue In British House Of Commons

London, Eng.—The House of Commons adopted an amendment for appointment of a committee to report on the possibility of abolition of capital punishment.

When debate opened on a private member's resolution for abolition of the death penalty, Right Hon. John R. Clynes, secretary for home affairs, expressed government sympathy with the idea, but said the question of an alternative to such punishment was the rock on which all projects for abolition had split.

He agreed with the amendment finally adopted for study of the matter, which he hoped might lead to some practical result. In the course of the discussion Lady Astor expressed great disappointment in the attitude of the minister. She had broken a ten-year custom earlier today by appearing at the afternoon session without a hat as most of the other women have done regularly.

Solved His Problem

Immigrant Out Of Work Broke Window To Get Jail Term

Saskatoon, Sask.—Failing in his search for employment during the past month and being without friends in this country, Joseph G. Jackson, immigrant, solved his part of the unemployment problem by throwing a brick through the plate glass window of the government liquor store on Third Avenue.

The crash of the glass evidently went unnoticed at the time so Jackson hunted up a sergeant of the police and told his story, and was taken to the cells. In police court he admitted his guilt and stated that he fully expected to go to jail, and was not disappointed for Magistrate Brown sentenced him to six months in Prince Albert.

Received News By Radio

And V.C. Holder In Isolated Settlement Will Attend Prince's Dinner

Winnipeg.—Word of the Prince of Wales' dinner to be given November 9, in honor of all those who won the Victoria Cross, trickled into a little settlement 100 miles from Salmon Arm, B.C., recently. Major R. McGregor, stationed at the little settlement, received the news over the radio.

Major McGregor, whose valor on the field of battle while serving with the 2nd Canadian Rifles, earned him the V.C., lost no time in setting out on a hurried trip to New York from where he sailed on the S.S. Olympic for London. He raced 100 miles by auto to the railway station at Salmon Arm, where he arrived only fifteen minutes before his train left.

DOMINION STATUS FOR INDIA WILL BE CONSIDERED

London, Eng.—A London newspaper published what purports to be a summary of the report of the Indian central committee, appointed under Sir Nankaran Mair, from members of the Indian legislature, to work in co-operation with the Simon commission on statutory reform. The commission has concluded its work after a month in London, and is ready to submit a unanimous report to the viceroy of India, with whom lies discretion regarding publication.

The newspaper report, however, suggests the committee practically recommends something like Dominion status for India and full autonomy for provinces.

The newspaper continues that the report recommends formation of an Indian privy council under the chairmanship of the viceroy. It demands that the Indian parliament be given greater control of the army votes, and expresses the opinion that India, if left free, would desire to recruit its police service largely from England, but that India would be able to maintain her own judicial service.

Delhi, India.—Viceroy Lord Leroy was said today to intend to issue a proclamation which will deal with the question of Dominion status for India, and announce the summoning of a conference in London to discuss the future constitutional development of India.

It was assumed that pending the decision of the British government in regard to recommendations that may be made by the Simon commission, the proclamation will make no distinct promise that will indicate the policy of Great Britain.

CANADA OFF GOLD STANDARD FOR SOME MONTHS

Montreal.—The Montreal Star says that "because of the stringency which has existed in Canada for money and in order to protect Canada's position Canada has been unofficially off the gold standard for the past six months. At the verbal request of the Minister of Finance, the banks have refrained from shipping gold, although Canada's money has been at a discount which made it profitable to ship gold to New York.

"Although the condition has been in existence for some time it was not generally known that the finance minister of the Dominion had taken the step which investigation now shows that he had. The situation is one which is regarded as being extremely acute although it is believed that the condition will right itself in the ordinary course of events.

"In acting as he did, the finance minister was assuming unusual powers for the purpose. Although the practice was to ship gold under the circumstances, Ottawa acted in order that the gold situation of the country might be maintained during a period of abnormal strain.

"The situation is one which is regarded by financiers and economists alike as being extremely acute and conclusions should not be arrived at hastily. When the move was made to place an embargo upon gold, some six months ago, Canadian banking officials were frightened by the prospect of private manipulators using American money and demanding gold of the Canadian government.

"The entire financial structure of the Dominion would have been gravely endangered if the finance minister had been placed in the position where he would have been forced to refuse gold in redemption of Dominion currency. The huge profits which could have been made by the transfer of gold have been disregarded by those who were in a position to take advantage of the situation.

"The normal results of the crash in the New York Stock Exchange and other exchanges throughout the world will bring about an alleviation of the demand for New York funds. The drastic reduction expected in funds on call in New York will be one of the main factors in bringing about a substantial increase in the Canadian gold," the paper concludes.

Destroyers Ordered To China

U.S. Division Intended To Remain At Manila Several Months

Manila.—Orders despatching the 45th destroyer division immediately to Chinese waters, "in view of a possible need there," were received at Manila, where the fleet was.

The destroyers arrived here recently for the navy day celebration, and had apparently intended remaining for some months.

Naval officials were reluctant to discuss the order returning the destroyer fleet to China, whence it had just returned.

Is Protecting Employees

Chairman Of Chicago Firm Guarantees Stock Market Account

Chicago, Ills.—In a copyrighted article, the Herald Examiner said that Julius Rosenwald, chairman of the Board of Sears-Roebuck and Company has guaranteed the stock market accounts of the more than 40,000 employees of the company.

He has pledged his personal fortune of millions of dollars to prevent any employee facing the danger of having his savings swept away, the story said.

Terminal Bins Again Full

Winnipeg.—By a forward bound of one-third of a million bushels in 24 hours, grain storage at the head of the lakes, on Oct. 30, stood at a new high mark for the season. A total of 75,407,000 bushels were packed into the high-piled bins—200,000 bushels more than at any time since the movement of 1929 grains began.

Russians Condemned To Death

Moscow.—According to despatches of the Tass News Agency, twelve Russians were condemned to death in various parts of the country for crimes that ranged from murder and arson to anti-Soviet agitation. They included two priests, one Mullah and four rich peasants.

Act May Be Amended

Ottawa.—The next session of parliament may see amendments to the insurance act covering the investments of insurance companies in common stocks, it was learned here.

Victory Of Canadian Women

Believed That Judgment Of Privy Council Will Mean Eligibility Of Women For House Of Lords

"The House of Lords next." That is the thought which runs all through the comment on the judgment of the Privy Council, which recognized the eligibility of women for appointment to the senate of Canada, says a despatch from London, England.

Practically every newspaper in Britain gives prominence to the ruling. The victory of Canadian women, it is generally felt, can scarcely fail to affect the claim of women to sit in the House of Lords as peeresses in their own right, whether by inheritance or creation.

Mrs. Helen Archdale, president of the Women Peers' Society, which is agitating for peeresses in their own right to be admitted to the upper chamber, declares the judgment certainly strengthens their position considerably.

Miss Collinson, organizer of the British Commonwealth League, describes the judgment as a real triumph. "It is far more significant and far-reaching than it is possible even for lawyers to comprehend," she says.

The Daily Herald says: "The public spirited pertinacity of Canadian women, who appealed to the Privy Council against the Canadian supreme court's decision, is splendidly justified in the event. And while supporters of the doctrine of electoral equality will everywhere welcome this latest victory in a hard-fought and many-phased battle, nowhere will it be welcomed more whole-heartedly than in the labor and socialist movement."

"Perhaps the second chamber may remain the last male reserve, but not, we suspect, for many years more," concludes the Daily Telegraph. The British end of the controversy dates from 1919, when a seat in the House of Lords was claimed on behalf of Lady Rhondda, a peeress in her own right. A private member's bill was passed in the Commons, enabling women to exercise all public functions, but did not get through the House of Lords. Later the government sponsored a similar bill with a specific clause enabling the King to summon a peeress otherwise qualified. The lords rejected the clause and the commons reinstated it. The lords threw it out. After a long legal battle the matter was dropped until Lady Astor introduced a new bill, which, so far, has not met with any success."

The Empire's Future

British Dominions Have Millions Of Acres Not Yet Developed

There are probably some 25,000 million acres of land within our Imperial boundaries which are available for development. In Canada alone barely one-tenth of the possible soil is actually in use, and there is much the same story to be told all over the world, wherever the British races hold sway. We need not, then, reconcile ourselves to poverty. We are potentially not only the richest people in the world, but also the richest people the world has ever known.

British Are Thrifty

Rt. Hon. Philip Snowden, chancellor of the exchequer, before the international thrift congress at London, England, pointed out that despite the unemployment in Britain, more than $7,500,000,000 was invested in thrift organizations and the amount was steadily increasing.

Tar Sands Development

Development of the tar sands and salt deposits at Fort McMurray, Alberta, along profitable lines, will be studied by experts and engineers of the Canadian Pacific and the Canadian Northern Railways, according to E. W. Beatty, Chairman and President of the Canadian Pacific.

"That is the hole through which a ring was stolen from the coffin of the King of the Goths. The police haven't found the thief yet."

"When did it happen?"

"In the year 500."—Lustige Blaetter, Berlin.

W. N. U. 1810

The Hoarding Of Money

Miser Is Not the Only Person Who Does This

A woman found dead in a small apartment in a poor quarter of New York was found to have savings amounting to $500,000.

Evidently she belonged to a type of individuals who live in fear of dying in want, and deny themselves the ordinary comforts of life, although they have plenty. Such people are rightly dubbed eccentric.

Yet there are many people who practically do the same thing, only living comfortably. They are normal citizens in every way except that they like "making money" and derive a peculiar pleasure in watching the figures mount up in their pass-books.

A man lives to a good old age. He gives his family all reasonable needs, and contributes faithfully to community purposes. Yet he never "steps out" to enjoy the good things of this life. He never travels, nor puts into his home any of the real luxuries that make the journey happier in the way that people of lesser means dream of doing on the day when "their ship comes home."

He never spends much more than the average man every week. But it is found when he dies that he has left one, two or three hundred thousand dollars to be divided among the younger members of his family. If he had spent a few thousand dollars a year more in having a good time he would have got great enjoyment out of it, and his family would not miss it when the sharecut came.

Between the person who is regarded as eccentric in hoarding money, and the man who accumulates money which he never enjoys, the line of demarcation is quite thin.

Storing Potatoes

Proper Storage Of Tubers Is a Matter Of Great Importance

The short potato crop this year in many parts of the country makes it more than usually necessary to take steps to avoid loss by rot in storage. Late blight and rot causes tremendous losses in the potato crop in most years. Covering a five year period of investigation it was shown that in unsprayed potato fields in Prince Edward Island, late blight was chiefly responsible for reducing the yield to an extent of 130½ bushels to the acre.

This investigation was carried out by the botanical division of the experimental farms. The results of the study with recommendations for controlling the disease are contained in Bulletin No. 119, of the Department of Agriculture, at Ottawa.

Proper storage of the tubers is a matter of great importance. While late blight rot, it is stated, does not spread from tuber to tuber in storage, it should be observed that under poor storage conditions the way is paved for spreading the disease. Before placing in storage, it is recommended that the crop be allowed to sweat in a pile for a few days. This enables the infected tubers to be detected and discarded. Dry storage not higher than 40 degrees Fahrenheit, in temeprature, will retard the development of the blight rot.

Have Never Seen Auto

California Family Lives Where Pack Horses Are Used

California, the state which boasts one automobile to every family, and two for most, has at least one family of six children that never has seen an automobile.

That is the story told by Wesley and Ernest Hewitt, members of an automobile firm at Modesto, California, after a deer hunt in Mendocino county's wilds.

The two Modestans went so far back into the timberland of the northern country that they had to leave the roads and use pack horses.

At the end of their journey, they found a mountain family with whom they boarded. The six children of the family, the Modestans said, tramped five miles daily to school, had never seen an automobile except in pictures, had never witnessed a "movie" nor heard a radio.

The hunters said the family lived among an abundance of food. Meals served comprised 18 different foods grown or killed near the mountain cabin, they said.

In Final Stages

Research with the object of producing a rust-resisting wheat is today in its final stages at the University of Saskatchewan. Tests which involved the seeding three years ago of 45,500 hybrid strains of Marquillo-Marquis wheat have reduced the total to only 38 varieties. Experiments for root rot resistance are still required.

Jones: "Why, I thought your car was a self-starter!"

Brown (cranking heavily): "It was—in the catalogue."

Canadian Eggs Grade High

Should Not Be Affected By Britain's New Marketing Act

Canadian eggs that will hereafter reach the British market will be confronted with a new condition. There is now in effect a new marketing act in the Mother Country which requires that all imported eggs from the various parts of the Empire must be clearly marked with ink "Empire," or with the country of origin. W. A. Wilson, the Agricultural Products Representative for Canada in Great Britain, has expressed his view of the situation in a statement forwarded to the Hon. Dr. Motherwell, Minister of Agriculture, in which he speaks with confidence of the position that Canadian eggs will occupy. The quality of Canadian eggs as compared with that of competitors who supply storage eggs, he says, is excellent. This state of affairs he regards as a direct result of the operations of egg grading in this country. Canadian eggs under the new situation, Mr. Wilson considers, are without a handicap, and although Canada's relative future position with competitors cannot be forecast with certainty, it may be viewed, in the opinion of Mr. Wilson, as one offering encouragement, because where our eggs are known best their quality is appreciated. Mr. Wilson concludes his statement with a message to egg producers, dealers and egg exporters, pointing out that Canada has a fresh opportunity well worth safeguarding, and that each should be alive to every detail that would tend to conserve the eggs in the freshest condition possible.

Pays His Own Penalty

Heavy Eater Does Not Menace Others Like Heavy Drinker

"Heavy eater is much nearer death than he who drinks too much" according to a headline on a Chicago despatch, quoting a speech of Dr. Edward Martin of Philadelphia before the American College of Surgeons. But the speaker failed to take into consideration the number of innocent people who may have their lives shortened as a result of another man drinking too much. The man who overeats may shorten his own life, but he does not jeopardize the lives of other people.

Power Scheme For Edmonton

The entire power line from the plant at Ghost River to supply Edmonton under the new agreement will cost in the neighborhood of $1,350,000, according to an announcement of the Calgary Power Company.

Germany led the world in the increase of merchant shipping last year.

Seed Corn For Next Year

Method Of Drying Corn On the Cob For Next Year's Planting

If locally grown seed corn is to be depended on for next year's planting it is important that the seed be properly dried and wintered. When brought from the field, corn on the cob contains from thirty to forty per cent. moisture. This moisture must be reduced sufficiently so that it will not be damaged by either disease or freezing.

A good method of drying the seed and keeping it over the winter is explained in a new bulletin from the Brandon farm, entitled "Corn Growing In Manitoba." Mr. Tinline, the Superintendent, and his associates, recommend hanging up the ears, or placing them in racks in a dry, well-ventilated room. It may be necessary to keep a fire in the drying room, and to provide for a good circulation of air. Seventy-five pounds of ears when dried will give about fifty-six pounds of shelled corn.

Some Manitoba corn growers plait the husks together suspending the ears in strings. This Bulletin which is numbered 121, of the Department of Agriculture, at Ottawa, contains illustrations of devices for holding and drying corn on the cobs. At the Brandon Farm corn is dried in racks. The cobs piled like cordwood are held in place in racks that are illustrated in the bulletin, which is obtainable from the Publications Branch, Department of Agriculture, at Ottawa.

This Bulletin covers the whole subject of corn growing in Manitoba, and relates the history of the culture of this crop which shows that it has been cultivated in this province for perhaps one hundred years.

Seed Crops Inspection

Dominion Seed Branch At Saskatoon Reports On Work For 1929

The Dominion Seed Branch at Saskatoon reports the following areas of seed crops inspected in 1929; wheat, 28,732 acres; oats, 4,763 acres; barley, 1,397 acres; rye, 229 acres; and flax, 1,574 acres. The estimated yields from inspected crops are: wheat, 567,467 bushels; oats, 225,804; barley, 38,338; rye, 4,566, and flax, 13,798 bushels. The total area inspected in 1929 was 36,695 acres against 18,188 acres in 1928.

Found Rattler-Porcupine

A porcupine with rattles on its tail was among the interesting specimens sent to the Field Museum in Chicago by the Kelly-Roosevelt expedition to Asia. Although the rattles differ widely in construction from those on rattlesnakes, they create a sound very similar as the animal prowls about in the grass.

The Greeks are thought to have used coal more than 2,000 years ago.

GOVERNOR-GENERAL WELCOMING RAMSAY MACDONALD

Lord Willingdon, welcoming Premier Ramsay Macdonald to Canada upon his arrival at Ottawa after his memorable visit to the United States.

Intelligence Is Not Based On Education

Brains Are Inherited, Says Psychologist Of Colgate University

Brains are a matter of relativity, says A. Laird, of Hamilton, N.Y., director of Colgate University psychological laboratory. Physical differences are as nothing compared with the enormous differences that may be found in mentality, Dr. Laird says.

"Education does not seem to improve one's regular equipment of brains," he added. "Children who are found by tests to have a little less than the usual modicum of brains in the first grade are still a little behind the average when they are in the fifth grade, and in case they reach the eighth grade, they still test a little below.

"Intelligence is not increased by going to college. Neither is it a chance affair. Parents with brains much above the average have children with brains much above the average. Brains seem to be quite definitely inherited, just as eye color, stature or temperament.

"If education does not improve intelligence, what makes college men successful? Of hundreds of thousands of men tested in the army during mobilization, the average score was 65. After the war the same test was given to a large number of students entering college for the first time. The average score by these freshmen was 150.

"This does not mean that the college freshman has twice as much intelligence as the army man, since the army score does not start with zero. But this difference does mean that the ordinary college man is much better equipped with brains than the ordinary man on the streets."

Made Tidy Profit

Girls Given Ten Dollars For Dollar-Fifty Jug Of Syrup

There is a town in Canada noted for its syrup, and two young ladies returning from there decided to bring back two jugs of it as presents for friends in New York. Motoring, they crossed the border at Rouses Point. The inspector, after poking through their baggage, sniffed at the jugs, grinned, and waved them on. This, the girls noticed, brought forth stares of amazement from two young men in a car directly behind them. Further along the girls stopped at a roadside restaurant for lunch. The meal was rudely broken off when they looked out of the window to see the two men in the roadster drive up to their car, grab one of the jugs, and whirl away. They rushed out and found on the driver's seat a ten-dollar bill and a note which said, in effect, that two men could get more fun out of a jug of whiskey than two girls could and that anyhow, fifty-fifty was only fair. As it happened, they were off their percentage. The syrup had cost only a dollar a jug.

Canada's Important Position

In Proportion To Population, Dominion Ranks High As Producer

Although Canada possesses only about one-half of one per cent. of the world's population, the Dominion produces about nine per cent. of the world's wheat, over 10 per cent. of the world's oats, nearly 10 per cent. of the world's gold and silver, 15 per cent of the world's wood pulp, and 90 per cent. of the world's nickel. Canada contains 16 per cent. of the world's known coal resources, has greater asbestos and nickel deposits than any other country, and ranks third in the production of gold. Canada ranks eighth among the countries of the world as a producer of cheese and fifth as a producer of butter.

Width Would Not Help

Many papers in the United States are urging that highways should be built wider so that there will be room for pedestrians along the side. No matter how wide they are made the motorists would use the entire width. A raised cement barrier, fencing off a sidewalk preserve for the pedestrian, might do the trick.

Starting Engine In Cold Weather

Starting a car on a chilly morning will be found easier if the engine is turned over with the crank handle a few times and then release the clutch before stepping on the electric starting button. Batteries become weak in cold weather. The engine becomes difficult to turn over because the oil becomes stiff.

Also Sun Proof

Mrs. Shopalot—You say this material is the very latest in fashion?

Clerk—Yes, madam, and it's shrink proof.

Mrs. Shopalot—But will it fade in the sun?

Clerk—No, madam; it's been in our window for two years.

The Adolescent Age

Duty Of Parents In Helping a Young Boy Or Girl Through Early Life

There is no more critical time in a child's period of up-bringing than that which is called the adolescent period—that is to say, from twelve years old to sixteen years old for a boy, and from twelve years old to twenty years old for a girl.

Those of us who have been through the experience of helping a young boy or girl through this time know how true it is to say that there certainly are quite a few problems. But we must not allow them to look too large, so that we lose our sense of proportion. We all know that children are about the finest things there are in the world, and we cherish them and find them a constant source of pleasure. We must remember that we weren't little angels without any faults ourselves. So if your son, when he is in the adolescent period, becomes a little restless and hard to handle, or your daughter becomes a trifle rebellious, just remember that it is perhaps normal, and that he or she will probably, with a little delicate handling, survive it very nicely and grow up to be a very fine man or woman, of whom you will have every reason to be proud.

When a child is very young, he goes to his parents for his information; he believes everything they tell him; he thinks they know everything. By and by he begins to get out and meet other people. He learns things from his school teacher and his Sunday School teacher, and his playmates, and neighbors that he never heard before. So he discovers that there are even things about which his parents don't know anything, and his early over-estimation of them is apt to become under-estimation.

Yet there is nothing very serious about them. In fact, psychologists who have studied this very matter have come to the conclusion that if a child didn't pass through this period of disillusionment, it would mean probably that there was something seriously wrong. He would remain a child, and be unfit to go out and assert himself as he needs to, in the outside world.

The troubles of a young boy or girl are just as enormous to them as your own troubles are to you. If you make him your confident, he will come to you with his problem, and you can help him. If he is ridiculed, or nagged, or treated with undue harshness, he never will, and the parent that does these things is apt to lose his greatest hold on the boy.

To lose one's temper with a young boy or girl, is a sign of weakness that he or she may never forget. He should never be punished in anger. Neither should he be permitted to be habitually disobedient. Firmness with him in the things he does after he has been told are wrong, is essential, and so is team work on the part of his parents. They should agree on what he is to be taught. If one tells him he can do something and the other tells him he can't, he is apt to lose confidence in them both.

Proper sleep, nourishing food, and plenty of air and sunshine, are further essentials to the development of the young boy or girl. They should be served with good plain foods as far as possible, with vegetables, eggs, milk, fruit, predominating in their menu. They should be encouraged to play and to exercise in the open air, because the day is not far distant when they will require all the strength they can summon for their daily work.

How Grasshoppers Breathe

Grasshoppers which, like all other insects, have no lungs, breathe through an intricate system of air tubes ending in tiny valves in their sides. The insects are able to control the operations of these pipes and portholes at will.

The word "money" originated in Rome, where coin was minted in the temple of Moneta.

Tun is a liquid measure formerly in general use, but now obsolete. A tun of ale was 216 gallons.

Waitress: "The client complains that this sandwich is small."

Managress: "Put it on a smaller plate and take it back."—En Rolig Half Timma, Gothenborg.

Figures Showing Cost Of Wars Should Bring Home To Everyone The Futility Of Armed Conflict

Everyone must fight if we have another war. The fighting won't be only on the battlefields. There will be fighting on the land and on the sea and in the skies. It will be carried right into the homes of the peoples. Everyone will fight — and everyone will lose. The cost would be unthinkable, and part of the price might be our civilizations. Even the victors must lose in modern warfare.

The Napoleonic wars (1790-1815), a conflict that lasted 9,000 days, killed 2,100,000 human beings, and cost $3,070,000,000.

The American Civil War (1861-1865) lasted 1,350 days, cost 635,000 lives, and $7,000,000,000.

The Franco-Prussian war (1870-1871) lasted for 210 days and cost 280,000 lives and $3,210,000,000.

The Russo-Japanese war (1904-1905), lasted 548 days, cost 160,000 lives and $2,100,000,000.

The above figures are for wars of the recent past, but how they pale before those of the World War!

The World War (1914-1918), lasted 1,563 days, cost 9,818,000 lives and $186,233,637,097.

Now, all the real property in the United States, from the Canadian border to the boundaries of Mexico, and from the Atlantic to the shores of the Pacific Ocean, are worth considerably less than the cost of the World War.

It should interest and impress all engineers, business men, and all other people with common sense to learn that all the steam railroads and their equipment, all the motor vehicles, all the street railways, all the telegraph systems, all the telephone systems, and all the electric light and power stations of the entire United States of America could be purchased for a sum of money considerably less than one-quarter of the cost of the World war.

We have been told that of all the moneys raised from the peoples of the earth in taxation, eighty cents out of every dollar goes to defray the costs of the wars of the past and in the preparation of future wars. The thing is absurd.—General Electric Review: 1929.

Prizes For Canadian Fruits

Exhibits From Dominion Win Awards At British Exhibition

Thirteen first prizes in apples, one first in pears and four seconds in apples were awarded to Canadian exhibitors at the Imperial Fruit Show, which was held at Bingley Hall, Birmingham, according to cabled advices received at Ottawa by the Department of Agriculture. Eight of the first prizes were won by Nova Scotia apple growers, and four by British Columbians. Nova Scotians secured the three second prizes. The most successful individual Canadian exhibitor was Charles A. Bentley, of Berwick, N.S., who secured no fewer than five firsts. The Associated Growers of British Columbia, Limited, of Vernon, B.C., obtained three.

The British Columbia company were also successful in the British Empire section, securing a first and second prize.

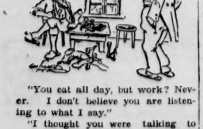

Record For Building

Building permits issued in Canada during the first eight months of this year reached a total of $168,606,059. Not only was this the highest for the period ever recorded by the Dominion Bureau of Statistics, but it was 16 per cent. above the previous high record in 1928.

Then there was the Scotchman who, when asked what he had clenched in his fist, answered: "My wife's false teeth—she's been eating between meals."

Venice, Italy, is built on seven hills, and is called the "City of the Seven Hills."

In 1922 the first telephone conversation across the Atlantic took place.

"You eat all day, but work? Never. I don't believe you are listening to what I say."

"I thought you were talking to yourself, sir."—Lustige Kolner Zeitung, Cologne.

Rural Credits

Dominion Farm Loans Board Now Operating In Six Provinces

The province of Manitoba which has just recently come within the scope of the Dominion Farm Loans Board's operations, brings the total of the provinces now embraced within the scheme up to six, declared Dr. J. D. MacLean, chairman of the Board here recently. Alberta, British Columbia, Manitoba, Quebec, Nova Scotia, and New Brunswick, are the half dozen in which the board operates.

Saskatchewan and Ontario have provincial system of rural credits, while Prince Edward Island apparently is in need of neither the one or the other.

The work of the board has been extended only recently into Quebec and Manitoba, and so far no applications for loans from these provinces have been received.

Since its inception until October 16 last, the board has approved 807 loans to the four provinces of Alberta, British Columbia, New Brunswick, and Nova Scotia; 67 have been rejected and 178 are pending. The total amount of money extended to applicants is $100,000.

675

SWATHED HIPLINE

A black crepe satin with buttons down the back is new youthful Paris vogue showing the very feminine note in swathed hips with huge puff at side that dips the hem. Sleeves are slenderly fitted with darts below the elbows.

Style No. 675 is cleverly designed to give heighth to the figure.

It is a dressy affair for afternoons that is simple enough for general wear, and it doesn't require any trimming.

It is captivating in black transparent velvet or in printed velvet in burgundy tones.

Claret red canton crepe, plum shade in silk crepe, purple crepe Elizabeth, dull black silk crepe, and hunter's green canton crepe smartly appropriate.

It's easily made and the saving is remarkable.

It's a wonderful opportunity to have a Parisian model that shows such perfect taste for all-around afternoon occasions, at the cost of the fabric and a few hours of your time.

It is designed in sizes 16, 18, 20 years; 36, 38, 40 and 42 inches bust.

Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"LAND OF THE SOVIETS"

Four Russian aviators flying the "Land of the Soviets" from Moscow to New York, took off on October 19, from Vancouver, Wash., for Oakland, Calif., first stopping point of their final long hop across the United States. The fliers were forced to land on account of engine trouble. The photographs show: (1) "Land of Soviets." (2) Philip Bolton, second pilot. (3) Dmitry Fufaev, mechanic. (4) Semen Shastakon, chief pilot, and (5) Boris Syeringor, navigator.

Received Queer Training

Men Unacquainted With Farm Work Returning To England

Some 200 men, who are returning to England, admit that though they accepted training there at the public expense, together with free board and free transportation to Canada, they never intended to do farm work. If their statement that they never saw a cow or a plow in the course of their training is correct, it would be interesting to learn what kind of training they were given and how much it cost. Taken together, the men's confession of their dislike for farm work and the complaint about the training suggest an explanation of the refusal of the Canadian farmers, with whom they were placed, to pay the promised wage of 10 pounds a month.—Truth, London, England.

To Study the Arctic

Expedition Of Graf Zeppelin Will Investigate Scientific Subjects

Dr. Walter Bliston, secretary and treasurer of the Aerial Arctic Society, announced plans for a voyage of Arctic exploration aboard the Graf Zeppelin to be taken next April by a group of 12 scientists headed by Fritz Jof Hansen. The principal objects of the projected expedition, Dr. Bliston said, would be to make the boundaries between the deep and shallow parts of the Arctic waters, to study meteorological conditions and to prepare for the establishment of scientific station in the ice fields.

The Wife: "There are two ways of looking at every question."

The Husband: "Yes, I know. Yours and the wrong one."

Says British Empire Not Commonwealth

Use Of This Title Wrong, Says Sir John Sandeman Allen

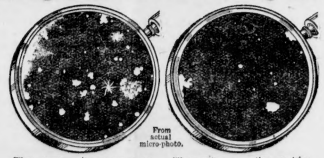

To call the British Empire a commonwealth of nations is quite wrong, the Toronto Board of Trade was told at the Royal York hotel by Sir John Sandeman Allen, J.P., M.P., chairman of the Royal Empire Society, member of council of the International Chamber of Commerce, and secretary of the commercial committee of the British House of Commons.

"Most people," he said, "talk about the empire as a comomnwealth of nations. This is wrong. The empire is divided into three parts, of which the British commonwealth of nations is one. This is the governing body of the empire, and is made up of a group of independent nations, who are mtually interdependent. There is not one country, but 407 separate nations of different creeds and castes, who before the advent of British rule were continually at war with each other, the weaker preyed on by the strong. Now India is two-thirds ruled by native princes responsible to the British crown, and kept together by Pax Britannica. The third part of the British empire is the colonial empire. This is the countries where the populations are not yet fit to govern themselves entirely, but are ruled by the crown, under the principles of *British freedom and equality for all.*"

Hailstorms are frequent and severe in sub-tropical regions and are rare in the coldest parts of the earth.

The White House was first painted white to obliterate marks of fire left by the British invasion in 1814.

Changed Methods in Handling Milk

Where proper sanitary measures are neglected the bacteria in a drop of milk look like this.

From actual micro-photo.

Where sanitary precautions are taken there are few harmful bacteria in milk. The white specks are bacteria.

How much do the farmers and dairymen of Canada and United pay in toll to bacteria in milk? In process of arriving at the answer to this question, representatives of leading milk and dairy products companies of New York recently met with officials of the State Agricultural Experiment Station, with the Department of Farms and Markets and the College of Agriculture at the Experimental Station, Geneva.

The bacterial count is being used more and more as a basis for determining how much per pound a farmer is to be paid for his milk. Getting the bacterial count under a given figure means millions of dollars annually to dairymen. Dairymen, themselves, are alive to this question, and where the milk produced is a material part of the income from the farm, complete sanitary precautions are being taken to insure a low bacterial count in the milk.

Precautions start at the beginning of milk production and continue clear through until the time the milk is in the hands of the consumer. To begin with, properly ventilated, easily cleaned stables are provided; plenty of bedding is given the cows; platforms are built the right length to accommodate the particular breed of cows that are kept; the gutter is built wide and deep; the animal is clipped about the udder and flanks periodically. The cows are groomed carefully every day and just before milking, loose particles of dirt are brushed off, or, when the cow is clipped, wiped off with a damp cloth. Small top milk pails are used to receive milk from the cows. Utensils such as milk pails, milk cans, milking machines and separators, are thoroughly sterilized after each milking.

The fresh-drawn milk is immediately removed to the cooling tank where it is cooled to a temperature of 50 degrees to 60 degrees Fahrenheit.

On receipt at the dairy, the creamery or the condensery, the same extreme sanitary precautions prevail. White garbed workers who have passed medical inspection, who observe rules of personal cleanliness as well as hygiene in the handling of milk and milk products, go about their duties efficiently and intelligently. Immediately after the pasteurizing of whole milk, it is bottled and capped. The date of bottling is stamped on the cap and the milk is usually sold before 36 hours have elapsed since pasteurizing.

What difference over the oldtime methods of handling milk!

It is these changed methods in the handling of the nation's milk supply that has swelled the individual consumption of milk to more than 54 gallons per year

Predicts That Crow's Nest Pass Agreement Will Govern Grain Rates On The Churchill Route

Lights Make Hens Lay

Increases Winter Production But Does Not Affect Yearly Total

In view of the fact that fresh eggs are nearly always a higher price during the winter season than during the summer many poultrymen have been interested in the possibility of increasing winter egg production by the use of artificial lights.

At the Dominion Experimental Station, Kapuskasing, Ontario, an experiment has been conducted for a period of five years in order to obtain some data on this subject. The experiment covered a period of six months each year, from November 1 to April 30, during which time the electric lights were turned on at four o'clock in the morning and remained on until daylight. One hundred pullets were used. These were divided equally as to weight, general development and breeding into two pens of 50 each. All conditions were made similar except that the one pen had these extra hours of light to work.

Over a five-year period the pen on lights produced on the average 3,966 eggs, at a cost of 20 cents per dozen, in the six months; while the pen without lights produced 3,671 eggs at a cost of 22 cents per dozen. This gives an advantage of about 300 eggs for the pen on lights and at a reduction in cost of 2 cents per dozen.

During two of the years covered by this experiment the test was continued until October 31, making the complete year. In the two-year average over the whole year, the pen with lights laid fewer eggs than the pen without lights.

From the figures obtained to date it would appear as though lights have an effect on the number of eggs laid during the winter months, when the eggs are highest in price, but on the other hand they do not seem to materially alter the total number obtained for the whole year.

Increased Demand For Beef

Price Will Be Higher Next Spring Is Prediction

Beef prices in Canada next spring will be high, due to the fact that there is a shortage of beef cattle in the country and comparatively few fat cattle going into winter feeding.

Trade reports for September show the exports of fresh beef to the United Kingdom as being nil, and the United States there was a falling off from $1,107,208 to $487,912.

No fresh beef has been shipped to the United Kingdom for several years. At present the price in Canada is so good and the demand so steady that there is only a spread of two cents a pound between the best English killed beef and Canadian beef. The cost of transportation is three cents a pound so that it does not pay to ship.

Supplies of cattle reaching Canadian markets at the present time are very small, say officials of the livestock branch, both in Eastern and Western Canada. There has been no liquidation, however, no forced selling, so the farmers have not done so badly.

The domestic demand at good prices indicates a measure of prosperity in the country, when people are able to buy meat at good prices despite the competition of the American consumer wanting Canadian beef.

The Psychology Of It

If you scrape the other fellow's fender, it is because he didn't give you enough room. If he scrapes your car, he is a nit-wit driver whose license should be taken from him. And just so long as this is the psychology of motor car owners, space will be set aside in the newspapers each day to record accidents.

A moose can pick up a scent more than a mile away.

He: "Have you heard that I have become an actor?"

She: "No, I only heard that you had gone on the stage."—Muskete, Vienna.

In the opinion of Hon. Charles A. Dunning, Minister of Railways, the Crow's Nest Pass agreement will govern the eastbound rates on grain and flour on the Hudson Bay Railway.

"There is no doubt in my mind," he said today, "that grain will travel to Churchill on a mileage basis the same as to Fort William." Mr. Dunning explained that he could not speak in regard to general freight rates, but grain was in a different category.

"In respect of all other rates," he said, "when the road approaches operation, the Canadian National will have to file their rate tariffs with the Board of Railway Commissioners and it will be open to everyone to appeal against these rates if they are not satisfactory."

Mr. Dunning said that he had been pleased to note that the people of Saskatchewan, in this respect, had not been inactive. The traffic organization of Saskatchewan, he believed, had been accumulating information on Hudson Bay route rates for some time and, undoubtedly, would defend the interests of shippers at the proper time before the rate making body —the railway board.

Mr. Dunning, as a matter of fact, has paid much less attention to the rail rate aspect of the Hudson Bay route than to the ocean rate. He regards the rail rates as being entirely within the jurisdiction of the Canadian people, while the ocean rates, which will be of equal importance to the success or failure of the route, are not controllable by Canada. Therefore he has designed the policy of his department from the outset of his administration to obtain as much evidence as possible on the vital question of the safety and efficiency of the Hudson Straits and the Bay from the viewpoint of navigation.

To this end, every ship which has been chartered by the government to carry supplies into Churchill or to sail in these waters, for any purpose whatever, has been chartered on the basis of time. As a rule, ships are chartered for a fixed sum, and the Dominion might have saved a little money by driving a hard and fast bargain with the owners of ships which have been chartered to sail in these waters. Mr. Dunning thought this would be unwise. He has chartered on time.

The result has been that he is building up a record of the time it has taken ships to get into Churchill and out again to home ports and is in a strong position to prove that the delays in navigating the Straits and the Bay, due to fog, ice or other perils, are negligible.

In regard to the general progress of the work, Mr. Dunning said that the railway will be in operation next summer and the port will be open for commerce in the fall of 1931. The past season has been very successful in every respect. The work at Churchill is well up to schedule. In fact, the work allotted for this year was completed on October 21, and the engineers took advantage of an extremely high tide on that night to beach the dredges and scows and tugs far back on the beach where there will be a minimum of risk from storms during the fall and spring.

During the summer 500,000 cubic yards of material had been removed from the harbor and it was only necessary for the dredges to stop work on one day on account of weather conditions.

While a little shore ice has been noticed at Churchill in the mornings during the last few days, Mr. Dunning stated that it would not impede navigation. With regard to the Straits ice, Mr. Dunning said that his reports today (Oct. 28), were to the effect that no ice is yet visible at any one of the three direction finding stations situated between the Atlantic and the Bay: Fox Channel ice, so often referred to as a peril to navigation in the autumn, has not yet appeared. There really seems not to be much difference in the temperature at Churchill and points inland. For example, the temperature on October 25 varied between 46 and 32 degrees above zero, which would compare favorably with most cities in Canada on that day.

Identity Not Important

The Governor of the State was inspecting some of its institutions. When he reached one of the insane hospitals he received a message to call his office on an important matter. Not getting as quick service as he thought he should, he barked at the operator, "I guess you don't know who I am?"

"No," replied the operator, "but I know where you are."

WORLD HAPPENINGS BRIEFLY TOLD

Marie, of Roumania, most unconventional and perhaps loveliest and loneliest of Europe's queens, celebrated her 51st birthday on October 29.

It is announced that E. W. Beatty, K.C., president of the Canadian Pacific Railway, has accepted appointment to the Canadian Olympic committee.

During September, the first month of the apple-shipping season, 89,476 barrels left Halifax for the overseas markets. This was more than double the exports of September, 1928.

Kaye Don, noted racing car driver, announces that an automobile in which he will seek a world's speed record, at Daytona Beach, Florida, has been nearly completed.

During his speech to the Canadian Club, while in Quebec, Premier Ramsay MacDonald confided to his audience that he proposed to make a trip to Hudson Bay, no matter who attempted to deter him.

Six men, jumping simultaneously from a 19-passenger airplane, demonstrated the possibility of safe descent from a disabled 'plane. The demonstration was made at Roosevelt Field, New York.

Lowest Infant Death Rate

Report Shows New Zealand Has Fewest On Record

"New Zealand's the best place in the world to be born. Babies born there have more chances of living than those of any other part of the globe!"

That is Sir Carrick Robertson's way of expressing the fact New Zealand's death rate among infants is the lowest on record for any country.

"However, grown people don't fare much better in New Zealand than in other first rate countries," Sir Carrick added. "The main health conditions are good, but we have some diseases that are peculiar to certain parts of the country, and these are quite a problem.

"Goitre is, perhaps, one of our worst diseases. It is caused from a lack of iodine in the soil, and there are a good many stretches in New Zealand thus affected. The younger generation is being protected to a certain extent by being fed iodized candy at school and many of the adults use iodized salt to combat the disease. Cancer, too, is just as insidious in New Zealand as elsewhere."

Find Body Of Prospector

Mounted Police Locate Body In Barren Lands Of Far North

The body of Joe Rutherford, old time prospector, who lost his life one year ago when a blizzard swept the barren lands of the far north, was found by Royal Canadian Mounted Police, it became known recently.

Tom R. Cowan, of Toronto, Rutherford's partner, who suffered so greatly in the same blizzard that both legs had to be amputated, was notified that natives and Mounted Police had located the body where he had directed Staff-Sergeant Joyce, at Chesterfield Inlet, to hunt for it. The body was buried where it was found.

Some men are like silver-plated knives; they look bright but are very dull.

Caught Him Off Guard

Plaintiff Lost Damage Case Through Cleverness Of Lawyer For Defence

A legal friend of mine told me the other day a good story illustrating the value of cross-examination in the hands of an expert at the game. At the time when the present Lord Birkenhead was plain Mr. F. E. Smith, he was retained by a tramway company in a running-down case. The plaintiff, a man of the laboring class, had had his arm injured, and he claimed that the injury was permanent and prevented him from working. If his case were correct, it was a case for heavy damages. Mr. Smith, however, was convinced that the man was exaggerating. The difficulty was to prove it. After several more or less irrelevant questions had been put and answered, Mr. Smith said to the plaintiff quite casually: "Would you mind showing the jury how high you can lift your arm since the accident?" The man, apparently with some difficulty, raised it to his shoulder. "Now," said Mr. Smith in the same casual tone of voice, "show us how high you could lift it before the accident." Up shot the plaintiff's arm, well above his head! The future Lord Birkenhead's insight into the man's mentality had won the tramway company their case.

Shipment Of Pure Bred Rams

Four Carloads Shipped From Ontario To Western Canada Points

What is hoped to be the first of a series of shipments of purebred rams from Ontario to the western ranches has just reached the prairies. The four carloads of 275 good purebred rams included Lincolns, Cotswolds, Leicesters, Hampshires, Southdowns and Cheviots, all selected by officials of the Canadian Co-Operative Wool growers Limited, who, along with the wool committee of the National Research Council, have been active in promoting sheep and wool interests in Canada. In the past large consignments of these sheep have been sent to the Western States for breeding with the native stock.

Crude Petroleum Production

Alberta Produces About 86 Per Cent. Of Total For Dominion

Figures published by the Dominion Bureau of Statistics show that during the first six months of the present year 470,238 barrels of crude petroleum, valued at $1,849,023, were produced in Canada. *This is an increase of 168,676 barrels, or $682,267 over the first half of 1928.* The Province of Alberta contributed about 86 per cent. of the total for the Dominion, having produced 405,970 barrels.

Smothering Spells
Couldn't Walk Far
Gasped For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath.

"A friend told me to try MILBURN'S HEART AND NERVE PILLS which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Pleased With Trial Shipments

Good Market Created In Dutch East Indies For B.C. Apples

From trial shipments of apples made in 1928, it has been definitely ascertained that there exists a market for British Columbia apples in Malaya and Dutch East Indies. During the three years a steady increase is shown in the number of boxes entering Java—nearly 50 per cent, since 1926, and the prospects are that 1929 will see a still further increase. Australia, the nearest, is naturally the chief source of supply, followed by the United States Pacific coast.

B.C. Exporting Lead and Zinc

A large movement of 1,500 tons of lead and zinc concentrates from Field, B.C., will begin shortly to flow through the Port of Vancouver, the zinc to Japan and the lead to the United States.

Newspapers were the only material used for the whole of a house, with the exception of the frame work, the windows and the floors, built in Massachusetts by a married couple.

ASTHMA
FREE TRIAL PACKAGE of Dr. J. H. Guile's Green Mountain Asthma Compound sent on request. Originated in 1885 by Dr. Guile, specialist in respiratory diseases. Its pleasant aromatic vapor quickly soothes and relieves distressing attacks. Standard remedy at all druggists in powder or cigarette form, 50c. and $1.50. FREE TRIAL package of 6 cigarettes. Canadian depot: Templeton's, Limited, Dept. BB-3, 286 St. Paul St., West, Montreal, Canada.

Dr. Guild's GREEN MOUNTAIN ASTHMA COMPOUND

Canada's Sound Position

Prosperity Due In Large Measure To Agricultural Development

"We are all primarily conscious of the fact that this country, measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbing stock markets and a rather unusual grain situation, both of which are, we hope, temporary," stated E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner given in his honor by the St. Catherines Chamber of Commerce.

"There is, perhaps," continued Mr. Beatty, "no one reason to which we can attribute all the improvement in Canadian conditions in the last few years, but there is one which stands out above and beyond all others, and that is the impetus given by successive crops, large in volume or in money value. We hope the time will come when our prosperity will be said to be equally balanced as between agriculture and the development of natural resources and industry, but for the moment we are preeminently still an agricultural country and that when providence ordains that our crops shall be large we are almost inevitably prosperous."

Lighted Arrows Show Direction Of Liners

Visible Signals May Largely Diminish Chances Of Disasters

Big liners in the near future may warn each other as regards the direction in which they are steering by means of large lighted arrows displayed on the bridge, following experiments carried out by the Royal Dutch line.

There have been many collisions owing to the international signals for steam whistle being misunderstood by vessels approaching each other on the high seas.

The new optical system installed on the steamship "Batavier V" consists of three arrows conspicuously placed on the bridge. One is horizontal, with the point to port and closer to horizontal, with the point to starboard, and the third is vertical, with the point upwards. When lighted, the arrows signify respectively: "I go to port;" "I go to starboard" and "I continue my direction."

Both Dutch and British authorities are closely watching the experiment well, in view to the general adoption of the plan.

Beer Brewing On Increase

More Beer Brewed In Canada Last Year Than Previous Year

More beer is being brewed in Canada. In 1928, gross production of breweries reached a value of $60,910,398, an increase of $1,116,187 over 1927. Net production value was $40,172,912, as compared with $34,056,725 in the preceding year. At the same time the number of establishments increased to 78, five more than a year ago, and capital invested moved up to $67,148,686 from $62,358,117.

By provinces, plants were divided as follows: Ontario, 36; British Columbia, 10; Quebec, 8; Manitoba, 8; Alberta, 5; Saskatchewan, 7; New Brunswick, 2; and Nova Scotia, 2.

Materials used in the industry cost $20,737,486. Canadian malt accounted for $7,409,992; foreign malt, $1,961,320; bottles, $5,926,056; cartons, $1,515,371; and hops $1,134,590.

Exports in 1928 had a value of $5,148,065, a slight reduction from the figure of $5,481,707, in the preceding year. Imports advanced to $248,091 in 1928, from $223,025 in 1927.

Noted For Honesty

The honesty of the British public is well known in the British Museum, according to the superintendent of the Reading Room, Mr. Sladen, who has just retired. He states that it is a very rare occurence to lose a book.

WORLD PEACE THROUGH MUTUAL UNDERSTANDING

Golden Text: "They shall not hurt nor destroy in all My holy mountain; for the earth shall be full of the knowledge of Jehovah as the waters cover the sea."—Isaiah 11.9.

Lesson: Isaiah 2.2-4; 11.6-10; 19. 23-25; Acts 17.22-28; Ephesians 4.4-6, 13-19; John 4.20, 21.

Devotional Reading: Psalm 98.1-9.

Explanations and Comments

Isaiah's Prophecy Of Universal Peace, Isaiah 2.3-4.—In the midst of foes within and foes without, at a time when the fear was overwhelming that Assyria would capture Judah, the prophet Isaiah had his vision of a time of universal peace. "It shall come to pass in the latter days"—thus his prophecy begins. The expression "the latter days" has the general meaning of "future time." In the far-distant time, Mount Moriah, on which the temple was built (the mountain of Jehovah's house), which stands here for Jerusalem, "shall be established on the top of the mountains, and shall be exalted above the hills." "Interpret the words figuratively as meaning that the fame of Jehovah will become so great that it will eclipse that of all other deities. The metaphor may be based upon an ancient belief that there was a mountain reaching from earth to heaven, on whose summit the gods dwell." — Cal Elsclen. "And all nations shall flow into it"; the time will come when other nations will acknowledge the supremacy of Israel and will say, "Come ye, and let us go up to the mountain of Jehovah, to the house of the God of Jacob," the seat of God's universal dominion; "and He will teach us of His ways, and we will walk in His paths."

Jerusalem, Isaiah tells us, shall be so lifted up as to become literally the light of the world, the true source of law and teaching. Well, history has fulfilled this prophecy, though not possibly as Isaiah anticipated. The actual Jerusalem is a little grey city, much scarred by millennniums of fighting in the uplands of Palestine; but, none the less, directly and indirectly, whatever our Christian world has of faith or vision today, has come from that city and from those who have walked its streets. Truly in this sense the mountain of the Lord's house has been exalted above the hills."—Gaius Glenn Atkins.

Therefore they shall beat their swords into plowshares; and their spears into pruning-hooks; for the ideal glorious future nations shall not lift up sword against nations, neither shall they learn war any more. The plowshare was used for the stirring up of the soil, but it was only a small piece of iron somewhat resembling a sword in shape, and could well have been made out of a sword.

"Then I dipped into the future far as human eye could see;
Saw the vision of the world and all the wonder that would be. . . .
Saw the drums thudded by no finger,
and the battle flags were furled
In the Parliament of man, the Federation of the world.—Tennyson.

Nature's Speed Artist

Insect Size Of Bee Travels 815 Miles Per Hour

The fastest known bird is the spine-tailed swift, which reaches the speed of 220 miles an hour over the mountains of Asia; the tarpon, of Florida, the fastest fish, can cover 80 miles in an hour; and the Indian cheetah, the speediest animal on legs, is credited with 60 miles per hour. Man has beaten all these records; but he is still second to an insect. A fly no bigger than a bee which has been recorded to do 815 miles per hour.

Cargo Of No. 1 Hard Wheat

What is believed to be the first full and exclusive cargo of No. 1 hard wheat ever taken out of the twin ports of Port Arthur and Fort William was loaded from Saskatchewan pool terminal No. 7 into a tow barge on Saturday, October 12th. It consisted of 500,000 bushels consigned to Erie, Pa.

Use Gopher Pelts

Gopher fur ranching may be the next development in Alberta. The Lethbridge Herald reports that an eastern firm is endeavoring to secure a large number of gopher pelts for experimental purposes in the fur trade, and a communication to that effect has been received by the Board of Trade.

A Long Lived Horse

A horse 43 years old was recently exhibited in Germany. It is said that this horse has done all the work on a 16-acre farm and made a daily trip of 18 miles with a light waggon since three years of age.

Her Idea Of the Navy

Old lady (meeting sailor on country road): "Sir, do ye know my son, Jack, in the navy?"

Sailor: "Which ship is he serving in?"

Old lady: "What! Be there two?"

Canadian Wheat For India

The first full cargo of Canadian wheat ever carried direct to India left the Port of Montreal on Tuesday, October 8th, being 252,698 bushels bound for Calcutta.

When BABIES are upset

Baby ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you meet this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless but effective remedy for children; nothing that acts quite the same, or has quite the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria; the genuine bears Chas. H. Fletcher's signature on the wrapper.

New Scheme To Aid Settlers

"British Family Reunion Association" Has Many Prominent Members

With the object of giving a powerful stimulus to the immigration to Canada of British colonists who can be satisfactorily settled, an entirely new organization has been created by the Department of Colonization and Development, Canadian Pacific Railway.

The name of the new body is, "The British Family Reunion Association." Its activities will extend throughout the Dominion, and it is understood that the forces of the Canadian Pacific, the Hudson's Bay Company, many other organizations and influential Canadians will be joined in this effort to supply new emigration.

The heads of British families in Canada, while earning enough to properly support their families here, are unable, within a brief period to have sufficient money to bring their families to Canada, due to the fact that they have had to support themselves here and their families in Great Britain at the same time, will be assisted. Then there are families who have become comfortably established in Canada and who desire to help relatives and friends in Great Britain to come themselves of the opportunities which Canada has to offer, not only for the sake of the latter, but also for their children. The new association is designed to assist in the fulfillment of the wishes of the one and the ambitions of the other.

Stratford Players Coming

Famous Festival Company Is Again Appearing In Western Canada

Regina.—For an engagement of three nights, beginning on Monday, Nov. 11th, the famous Stratford-Upon-Avon Festival Company, from the Memorial Theatre at Shakespeare's birth-place, will appear at the Grand Theatre, Regina, presenting in the order named, "Much Ado About Nothing"; "Romeo and Juliet," "Julius Caesar," and "Twelfth Night."

The splendid artistic qualities of this organization are well known to playgoers through the appearance of the company here last season, when an entirely different repertory was presented. The plays on the present list are those that were revived at the Memorial Theatre last summer. The company is almost the same as last season, with only such changes in personnel as have been necessitated by the altered repertory. Among the players are: George Hayes, Wilfrid Walter, Roy Byford, Eric Maxon, Gordon Bailey, William Calvert, Oliver Crombie, Kenneth Wickisted, Ernest Hare, R. Eric Lee, Jack Bligh, Geoffrey Wilkinson, C. Rivers Gadsby, Noel Iliff, Joyce Bland, Fabia Drake, Mary Holder, Olive Walter, Miriam Adams, Dorothy Francis and Maud Garth. Monday evening, "Much Ado About Nothing"; Tuesday evening, "Romeo and Juliet"; Wednesday matinee, "Julius Caesar"; Wednesday evening, "Twelfth Night."

New Bridge For Vancouver

Increasing traffic, both freight and passenger, in the vicinity of Vancouver, has decided the British Columbia government to construct a new bridge across the north arm of the Fraser River from Vancouver, to be ready by the spring of 1930. It will be 130 feet in length.

Both the Mediterranean and the Gulf Stream which flows like an individual sea in the Atlantic, are very salty and of a deep and beautiful blue in color.

One Form Of Plundering

Usury In Its Worst Form Is Interest On Inflated Capital

The Toronto Telegram gives the story of a certain lawyer in the United States who ten years ago acted as counsel in a law-suit. He turned his fee of $10,000 into stocks in a gas company or something of that nature, and added $7,500 more to gain control. Then by manipulation and splitting of shares and by getting control of shares in allied concerns, he increased his capital to no less than $55,000,000; on which he draws interest. The figures may not be trustworthy but they illustrate a plan of financing that is all too common these days. And of course everything was within the law and therefore the manipulation was not looked upon as a crime. Were it a private transaction it would be called plain theft, for the consumers of gas were robbed — every one of them. Yet, because of lack of state supervision this form of plundering went unchecked and the man making the profit was called a financier. The worst of it is that many men envy him, and just wish they could have had an opportunity to do the same thing.

There is such a thing as legitimate interest on money borrowed or loaned, but in all ages and in all lands usury has been condemned — yet practised. Usury in its worst form is interest on inflated capital. Think of this, that the people in one state pay over seven cents for electricity when a neighboring state pays only two. There is need that governments examine into rates of profit in all money-making concerns with a view to protecting those who are borrowers and consumers.

This, of course, is only one side of the picture. The other may be presented again. — Western Home Monthly.

Just Right For Upset Stomach

For after-eating distress, gas, sourness and bloating, the quick and positive neutralizing action of Bisurated Magnesia has proved to be just right! Relief, certain and gratifying, almost instantly follows the very first dose—and a few cents worth obtainable from any good druggist, lasts for a long time.

An Early Tractor

Thirty years ago, on September 6, 1899, a steam tractor was demonstrated near Morris, Man. This outfit, travelling at about 1½ miles per hour, pulled ten ploughs, cutting a twelve foot swath to a depth of four inches. A roller was attached behind the ploughs, and it was claimed that a perfect seed-bed was created from raw prairie without back-setting.

Count Ferdinand von Zeppelin, noted inventor of dirigibles, was an officer in the balloon corps of the United States Army during the Civil War.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous, too. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend, taking the child. A week later Al learns she is at a New York hotel, ready to sail for France that afternoon. He calls her on the 'phone, and begs for the chance to say goodbye to Junior. Molly consents, so Junior is taken to the park entrance. It is a tragic farewell, for Al adores his boy. Junior says, "Do you feel bad, daddy?"

CHAPTER XX.

"I'm all right, Junior," said Al. "No, I don't feel bad. I'm just awfully happy to see you. I'll tell you something — you're going far away to another place on a great big boat. Take care of mother and don't let anything happen to her. Be good to her. And remember—you'll see daddy again; we must both wait for that time."

In the distance the nurse-maid was consulting the chauffeur as to the time. He looked at his watch and decided they should be getting back to the hotel. Al looked up to see the severe-faced nurse standing before him.

"I'm sorry," she said firmly, "but it' time for the young gentleman to return to his mother."

Junior turned on her quickly. "But I don't want to go."

The nurse tried to smile, but Junior continued with baby sternness. "If you take me away so soon I won't like you."

Al rose, gathering Junior in his arms. "Sh-h—Junior. It isn't nursie's fault that you have to go. You must be a good boy, every way, every day." Then Al turned to the nurse. "I'll bring him over to the car. Will you please go on ahead?"

The nurse preceded them, while Al made that one hundred-foot walk to the car last as long as possible. Would this really be the last time he ever saw Junior? Perhaps not, but it was quite possible that Junior would be a strapping youngster the next time they came together. If so his adorable baby sayings and his sense of baby gaiety would be gone. His sweet, confiding ways would be replaced by a boyish self-sufficiency. He might even forget his father entirely.

These thoughts travelled like burning darts through Al's mind. was it humanly possible for him to give up this little bundle of humanity? Could he live afterward? And then came the thought — take Junior by force, jump into taxi and drive off with him. For a moment this idea persisted with startling intensity. It would be so easy, and he would be justified in doing it!

But, no, Al just couldn't do it — he wasn't made that way. He was kind, generous, chivalrous. He loved Molly in spite of what she had done to him, and he knew she adored Junior. No matter how Molly had hurt him, Al's nature would not let him pay her back in k'nd. Let Junior go with her and perhaps she would relent and return with the child within a few months. He knew she would take good care of his son.

Al kept his facial muscles firm and controlled until the instant of saying goodbye and putting Junior into the car. Then he had to turn his face away again as he pressed Junior to him. He sa'd haltingly:

"Don't forget, Junior, your mother loves you—you're going to be awfully happy with her. Don't worry—about daddy."

Even the strange nurse was touched by this father's tragic face. Then Al, afraid of breaking openly, quickly passed Junior to her in the car. The motor purred, the door closed, the Rolls-Royce started to move. Al saw Junior's face, dim in the limousine's interior, gazing at him in wide-eyed, troubled wonder.

Al was smiling. It was a desperate effort, but Junior must remember him that way. As the car gained momentum the baby face appeared at the rear window; Junior was waving a frantic farewell. Al started to walk after the car—faster, faster. Now he broke into a run. His heart was breaking, but still he smiled and answered Junior's wave. He stumbled and almost fell, then caught himself up and ran the faster. But the little face at the window became blurred by the intervening distance and suddenly the car itself disappeared down the crowded Avenue.

When Al definitely lost sight of the car he stopped in his tracks. People on all sides were staring at him, conscious that he was passing through a terrible ordeal of some kind. As long as Junior was in sight he had kept up a brave front; now his figure sagged, and he stumbled blindly toward the nearest bench.

He sat with his arm flung across the top of the bench and his head in his arms. He felt that he could not bear to face the life that moved around him, so steadily and relentlessly, a law unto itself and ignoring his despair. He heard the steady hum of the motor cars up and down the Avenue, carrying women home from shopping tours, bridge parties and tea dates, carrying men home from offices. Faintly he heard the footsteps of the pedestrians who passed only a few feet away.

Many curious glances were directed his way. If he had been a down-at-the-heels derelict of the great city he could have sat for hours in that position without attracting any notice at all, but it was unusual to see a fashionably dressed young man with a silver-topped walking stick across his lap sitting on a bench just outside the park's stone wall in a posture suggesting despair. Two girls, passing close by, giggled, believing Al drunk. But when he raised his eyes and stared at them vaguely they relapsed into silence and hurried away.

Finally he stood up and turned back toward the bench where he had sat with Junior. Reaching it, he stepped close and touched it. He must always remember this bench, the scene of his good-bye to Junior. He took note of the fact that it stood beside a small, bare oak tree with a curiously gnarled trunk.

The winter day was darken'ng already; nurses from the fashionable houses along the Avenue were bringing home their baby charges who had been playing all afternoon in the park. There was a procession of them — babies in perambulators, little tots of two, three and four, carried in their nurses' arms or trotting along beside the women. Many were dressed similarly to Junior, some looked very like him. And Al stood, slightly away from the sidewalk, peering eagerly into the little faces, listening to the chatter and childish laughter. These youngsters —they were going home to happy nurseries, to fathers and mothers who loved them and were united.

How uncanny it was, thought Al, that this procession of babies passed him just at this time, when he had lost Jun'or. He stood like a statue until long after the last youngster had disappeared and the last remonstrating tone of the chattering French nurses had died away. Then he turned south toward the city's skyscrapers, already ablaze with light in the distance. Skyscraper apartments — home—reaching into the cold blue winter evening sky! Everything he saw brought comparisons emphasizing the pain of his loss.

He walked slowly, asking himself —Where was he going? Back to the apartment where Celeste, the maid, waited with pitying eyes, back to Junior's nursery? No, he couldn't do that. He must tell Celeste tomorrow that he was giving up the apartment. He would go to a hotel to-night.

But what were his plans? He must have plans, something to engage his interest, or he would go crazy with the pain of his loss. That was Al's big problem at the moment, and he knew it. Without plans he would be continually whirling in an emotional chaos.

He had plenty of money — that didn't worry him. And he knew that Molly had salted away everything she had earned as a revue singer. She was amply able to provide for Junior. Besides, John Perry had made himself rich as a booze racketeer. No, the money angle could be set aside.

(To Be Continued.)

HOW TO RELIEVE CHILDREN'S COLDS

Avoid Serious Results By Using Baby's Own Tablets

When a child shows the first symptoms of a cold, such as sneezing, redness of the eyes, clogged or running nose, prompt measures for relief may avert serious results. Mothers should always have on hand some simple safe and effective remedy for immediate use.

Baby's Own Tablets act quickly, contain no opiates or narcotics, are tasteless and harmless. Concerning them Mrs. Joa Cadieux, Holyoke, Mass., says:—"I have used Baby's Own Tablets for my children and find them a very satisfactory medicine. When my little boy had a cold I gave him the Tablets at night and he was well the next day. I gave them to the children for constipation and they are always benefited. think Baby's Own Tablets are much easier to give a child than liquid medicine. I strongly recommend all mothers who have young children to keep a box of the Tablets in the house."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Trade Within Empire

Canada Willing and Anxious To Extend Trade With Great Britain

Cables from Liverpool report the Hon. L. C. M. S. Amery, former Secretary of State for Dominion Affairs, as saying that the whole atmosphere in Canada was favorable towards doing business with Great Britain and the rest of the Empire—more so than at any time in the past. "She is in extremely good shape, indeed," he said, "with a steady all-round development."

A Clever Goose

A bright light of the goose world, in England, is Jimmy, a goose owned by a South Elssal miner. Leaping through a hoop, washing his face, toe dancing and jumping over his owner's arm are some of the tricks he boasts of. He partakes of his meals sitting in a high chair at the table and his manners are said to be perfect. He also stands at attention and salutes whenever the national anthem is played.

The game of billiards is very popular with teachers, professors and other professional men in Japan.

The early native of Hawaii had beautiful dishes of wood, carved and polished.

Use Minard's Liniment in the Stables.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

For COUGHS, COLDS, Bronchitis & Influenza

Take PEPS Tablets

PEPS

25c. box contains 35 silver-jacketed Peps.

A Law-Abiding Nation

English Obey Law and Support Authorities In Enforcing Same

No nation, not even the German is more law-abiding than the English. Not only does the individual obey the law, but he supprts the authorities in enforcing obedience on his neighbor.

"Not only is the criminal class in England small, and, to judge by the latest criminal statistics, diminishing, but the criminal himself shares with his more respectable neighbors the law-abiding instinct of the race," writes Geoffrey Layman, in the November Harper's Magazine.

"The safe-breaker," surprised in the midst of his nefarious operations by the solitary policeman on his beat, may in nine cases out of ten be expected to 'go quietly.' He is himself unarmed, and he knows that the policeman is unharmed, except for a 'truncheon' or club, so carefully concealed that I, the average citizen, have never even seen one in the hands or anywhere about the person of a policeman, although I know that it is there. There is a recognized etiquette in these matters. If the safe-breaker or burglar can finish his job and get away unseen, the trick is his; but if he is so clumsy as to allow the policeman to come upon him unawares, he murmurs 'it's a fair cop, gov'ner' and submits. No English policeman, unless he is on plain clothes duty, or on some very rare occasion when there is strong probability that he will be met, almost certainly by aliens, with violent and murderous resistance, is ever armed with any weapon more lethal than a truncheon; and it is very rarely, and usually only in street rows, that he has occasion to use even that. He has no need for anything more."

Canadian Is World's Champion

Montreal Youth Defeats Eight Nations In Oratorical Contest

Roche Pinard, of Montreal, representing the student orators of Canada, won the highest international honors in competition with eight others before members of the diplomatic corps and an audience of about 8,000 in Constitutional Hall at Washington. Herbert Shaumann, of Germany, was second, and Roberto Ortez Griz, Mexico, third.

Pinard took as the subject of his oration "Canada among the nations," and his address and the manner of its delivery in the French tongue was adjudged the best among those made by the youths of England, the United States, France, Germany, Denmark, Mexico, Cuba and Peru.

Worms, by the irritation they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

Eliminates Climbing

The highest and fastest lift in Europe is claimed for the Westminster Cathedral. In 32 seconds one is carried to a height of 185 feet. Before the lift was installed approximately 11,000 people climbed to the top annually.

HEADACHE RELIEVED QUICKLY

CARTER'S LITTLE LIVER PILLS

This Purely Vegetable Pill quickly corrects the digestive disturbances, removes the intestinal poisons, and sick headache quickly disappears. Your whole system enjoys a tonic effect, constipation vanishes, and you feel a renewed vigor. Avoid brownless and dope, they are depressing and harmful. All Druggists 25c and 75c red pkgs.

CARTER'S LITTLE LIVER PILLS

W. N. U. 1810

Holland Builds Largest Locks

Third Longer and Half as Wide Again As Panama Canal Locks

The most important of the numerous canals in Holland is that which since 1876 has connected Amsterdam, Holland's second seaport with the ocean. With the gradual increase in the size of the ocean-going vessels, says the Netherlands News Bureau, this canal had to be widened and deepened until at present it belongs, according to its dimensions, to the same class of large, internationally known artificial waterways as the Panama and Suez Canals. The North Sea canal has only one set of locks. These separate the turbulent waters of the North Sea from the calm, unruffled surface of the waterway and the many neighboring smaller canals and ditches. The locks are located at the coa.t near the town of Ijmuiden, one of the important fishing centers of Holland.

As the canal has grown, so have the locks. Those in use at the present time admit ships of about 20,000 registered tons to enter the canal and thus reach Amsterdam. The ever increasing tonnage, especially of the modern liners, made imperative the construction of new locks which would be able to accommodate ocean vessels of any size. The locks have been under construction for a number of years and are expected to be ready early in September.

They will be the largest locks in the world; in length they exceed the locks of the Panama Canal by one-third, in width by one half. The largest ships afloat, the Leviathhan and the Majestic, will be able to pass these locks without any difficulty. The preliminary depth of thirty-eight feet will give to the canal a profile with an area of about 14,000 square feet. This is more than the Suez Canal and a little less than the Panama Canal.

The gates weigh nearly 1,200 tons each. They are opened by rolling them back into recesses of exactly their size in the north wall. As no dry dock is available in the neighborhood which could accommodate the gates in case of necessary repairs the recesses had to be fixed up as dry docks. There are two gates in the western end of the lock chamber, one of which can be used as a reserve, to replace either of the other two. The lock chamber can be filled in less than seven minutes. When the tide is very high it will take a little longer. The whole lock is operated electrically.

Test Was Successful

New German Device Drives Car By Liquid Gas

A new type of automobile, with liquid gas as the propelling agent, has been successfully tested at Essen, Germany, by Max Valler, the inventor.

The car was set in motion by the force of the loud sputtering escaping gas from three steel tubes attached to the rear of the driver's seat. Speed through the air the car was controlled by opening and closing the escape valves.

The car reached a top speed of about 37 miles an hour, but the inventor said that with perfection of the method he expects vehicles to surpass all speed records, and predicted that the method would revolutionize the motive power for airplanes.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Canada's Grain Grading System

Is Regarded By Wheat Buying Countries To Be Best In the World

More than 90 per cent. of the wheat crop of Canada this year comes within the statutory grades. Leading agriculturists agree that its protein content averages 14 per cent. though there is some that runs as high as 19 per cent. While not wholly perfect Canada's grain grading system is regarded by the principal wheat buying countries to be the best in the world, according to the Dean of the Faculty of Agriculture, of the University of Saskatchewan, Saskatoon, who was a member of the commission which toured Canada taking evidence regarding the marketing and handling of the wheat produced in the Dominion.

Will Ship Coal Samples

Carload samples of coal from various British Columbia mines will shortly be forwarded to Ottawa, where arrangements have been made by the Department of Mines to test and tabulate the qualities of each coal for the purpose of designating the uses to which each coal is best suited.

Little Helps For This Week

"For the Lord God will help me."—Isaiah 1. 7.

Be but faithful, that is all;
Go right on, and close behind thee
There shall follow still, and find thee,
Help, sure help!
—Arthur Hugh Clough.

What I can do with my single arm may be mean enough; but that is not the question. The thing to consider is, what can I do with God to help me? And the difference of the one and the other is the difference between a man trying to push a train of cars up grade by his single puny strength, and the same man on a locomotive with the steam up, moving the whole mass by a turn of the wrist.
—Robert Collyer.

There are more than 3,500,000 dogs in France.

A greyhound can travel a short distance at a speed of 35 miles an hour.

THEY SAY Cow Clipping Pays!

A CERTAIN farmer wanted the facts about clipping cows so he wrote us for names of those owning clipping machines. He wrote them. Now he himself is so pleased with the Stewart clipping machine he sent us the letters which made him decide the clipping machine is a good investment. Here are some of them:

Vankleek Hill.

"I think a clipping machine is a sound investment, paying for itself — yes, ten times its price in one winter. Why? Because it eliminates the lice nuisance and naturally it takes less feed to keep cattle in good condition.

Bowmanville.

"It is the easiest way to keep cows clean. With the old hair off the lice do not bother. A farmer cannot afford to keep cows and not clip them, is my experience."

Tavistock.

"It is certainly reduces bacteria. It is a good investment to have the machine because it keeps down all the dirt and the milk keeps a lot better."

Aylmer.

"We have clipped our cows now for the last ten or twelve years. It sure does away with the lice and when you get rid of the lice the cows milk a lot better. It not only keeps the manure from clinging to their hams, but when the udder is clipped dirt don't stick to it and get in the milk. The cows look a lot better to sell."

HOW TO CLIP COWS

Manure, the principal source of bacteria, cannot collect and at milking time rub off into the pail if hair on udder, underline, flanks and tail is kept clipped short all winter.

Lice seem to congregate along the spine, which explains why some farmers clip a six inch width from tail to ears.

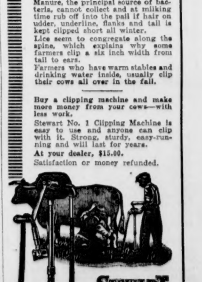

Farmers who have warm stables and drinking water inside, usually clip their cows all over in the fall.

Buy a clipping machine and make more money from your cows—with less work.

Stewart No. 1 Clipping Machine is easy to use and anyone can clip with it. Strong, sturdy, easy-running and will last for years.

At your dealer, $15.50.

Satisfaction or money refunded.

The Oyen News

About Town and Country

An armistice service will be held in All Saints Church, Oyen on Monday, November 11 at 10.45 a.m. All are cordially invited.

• • •

Mr. J. C. Desso was a business visitor in Calgary, the fore part of this week.

• • •

Miss Catherine Love, accompanied by her sister Violet, left last Monday morning for Saskatoon, to spend a few days in the city visiting relatives.

• • •

Mr. W. A. Johnson, who has been spending the last few months visiting his son and daughter-in-law, Mr. and Mrs. Harvey Johnson, left yesterday en route to his home in the states.

• • •

Mr. and Mrs. H. O. LaBelle, returned to Oyen last Thursday after spending a few days in Calgary.

• • •

Mr. G. L. Pratt and Mr. J. J. McIntyre returned home last Friday after a three weeks trip in the Peace River country, where they have located three and one half miles from Eaglesham, Alberta, They report that land in this vicinity can be easily cleared and give glowing reports of high yields.

• • •

The many friends of Mr. C. L Wilson of Sibbald, will be glad to know he is making satisfactory progress in Oyen Hospital.

• • •

Mr. Robert Lewison, who recently sold his farm adjoining the Fuego well, left last Sunday morning en route to his home in Norway. Mr. Lewison expects to spend about eight months in Europe before returning to this district.

• • •

Watch for the bills of S. A. Miller's fifteenth anniversary sale. They will be in the mail this week.

• • •

Sub zero weather prevailed last Monday and Tuesday mornings the thermometer registering a few degrees below the zero mark. Somewhat milder to-day, the probs for the balance of the week are "fine and milder".

• • •

School will be closed here Thursday and Friday, so that the teaching staff may attend the joint-Oyen and Hanna School Teachers Convention, to be held in Hanna on those days. The entire Oyen teaching staff, and Inspector Scott will be in attendance.

Miss Mamie Gibson of Lethbridge, Worthy Grand Matron of the Order of the Eastern Star, paid an official visit to Somme Chapter, No. 35, O.E.S., Oyen, last Monday. She was accompanied by Mrs. W. S. Cameron of Drumheller. While in Oyen they were the guests of Mr. and Mrs. Charles Stewart.

• • •

The C.W.L. will hold their annual bazaar, sale of home cooking and afternoon tea, on Saturday, November 23, in the Case show room.

• • •

The Women's Guild of All Saints Church will hold their annual bazaar and sale of home cooking on the first Saturday in December. (December 7).

Level Crossing Tragedy

Clarence Gilbertson Dies From Injuries Received In Level Crossing Accident

Hanna, Alta., Nov. 7.—Clarence Gilbertson, grain buyer of Richdale, former Oyen boy, died to-day in the Hanna hospital from injuries received in a level crossing accident, which occurred early this morning, near Hanna.

While leaving Hanna, en route to their home in Richdale the closed car, in which Jack Gresh, section foreman, Clarence Gilbertson, grain buyer, and Jim Dawson were travelling, was struck by the west bound passenger train and absolutely demolished. Gresh and Gilbertson died shortly after admission to hospital, and Dawson, who at first was thought to have a chance of recovery, died later in the day.

The funeral of Clarence Gilbertson, will be held in Oyen on Saturday.

Between four and five thousand bags of Garnet wheat are being shipped from Fort William to be tested by millers in Great Britain. Reports of the reception given these samples will be available before this year's crop is ripe, government officials expect. If these prove favourable the future of this early ripening variety should be assured.

Beef grading in Canada will be established shortly under regulations framed by the Dominion Government, R. S. Hamer, chief of the cattle division of the Department of Agriculture, announced at the annual meeting of the Ontario Cattle Breeder's Association in Toronto the other day. The proposed system will be a voluntary one and will be confined to municipalities with facilities for inspection and grading at the time of the slaughter. The aim in view is the stabilizing of the market and the breeding of better cattle.

Ramsey MacDonald Goes Home With V.C.'s

Completing his hurried Peace mission to the United States, the Rt. Hon. J. Ramsay MacDonald, Prime Minister of Great Britain, sailed from Quebec Friday, October 25th, on the Canadian Pacific liner Duchess of York which made a special call at the Ancient Capital.

He is shown above on the gangway surrounded by a group of Canadian V.C.'s, who sailed on the same ship as guests of the Canadian Pacific to attend the banquet to be given November 9th, by H.R.H. the Prince of Wales, to wearers of the coveted decoration.

Although the ship sailed at 7.45 p.m., the embarkation was made in bright artificial daylight created by a powerful "sun arc" which enabled movietone operators to make sound pictures of the Premier's farewell. V.C.'s in the picture are Captain G. B. Geary and Captain G. F. Kerr, of Toronto; Major T. W. MacDowell, of London; Lt.-Col. G. R. Pearkes, of Winnipeg; Captain B. S. Hutcheson; and Captain C. N. Mitchell. Inset is Captain R. N. Stuart, skipper of the Duchess of York, who will also attend the Prince's banquet.
